American Government And Politics Today 2015 2016 Book Only:

Manifesto for New Social Movements César Augusto Rossatto, 2019-10-01 The world is currently witnessing the emergence of a new context for education labor and transformative social movements Global flows of people capital and energy increasingly define the world we live in The multinational corporation with its pursuit of ever cheaper sources of labor and materials and its disregard for human life is the dominant form of economic organization where capital can cross borders but people can't Affirmative action democracy and human rights are moving in from the margins to challenge capitalist priorities of efficiency i.e. exploitation In some places the representatives of popular movements are actually taking the reins of state power Across the globe new progressive movements are emerging to bridge national identities and boundaries in solidarity with transnational class gender and ethnic struggles At this juncture educators have a key role to play The ideology of market competition has become more entrenched in schools even as opportunities for skilled employment diminish We must rethink the relationship between schooling and labor developing transnational pedagogies that draw upon the myriad social struggles shaping students' lives and communities Critical educators need to connect with other social movements to put a radically democratic agenda based on the principles of equity access and emancipation at the center of educational praxis Many countries in Latin America like in other continents are developing new alternatives for the reconstruction of social projects these emerging sources of hope are the central focus of this book Major historical change always starts with people's social movement Democracy can be one of the best political and social systems in the world but for it to work entails the sustainable participation of citizens Above all it requires that people be informed and critically educated since the quality of democracy depends on quality of education There are 2 kinds of power money and people If people exercise their agency they can be more powerful than money There are some organizing principles of social movements as don't do for others what they should do for themselves Saul Alinsky wrote *Rules for Radicals* A pragmatic primer for realistic radicals Mary Rogers Cold Anger A story of faith and power politics Michael Gecan *Going Public* An organizer's guide to citizen action and Ernesto Cortez's Industrial Area Foundation are all great sources for organized activism that do work I put some of these principles to the test and they produced positive results I was a founder and president of a union at my university and I lived my whole life as an activist and learned that we can do more together than alone Now we also have a new digital war with the Cambridge Analytica and Breitbart's fake news manipulation however we also have social justice hacktivism to counteract it as well as other democratic social media venues that critical thinkers and activists use The chapters in this book demonstrate the importance of widening and diversifying social movements at the same time emphasizes the need to build cohesive alliances among all the different fronts What some people think is impossible can become a transformed reality for those who dare attempt changing the world as global citizens

American Government Alan R. Gitelson, Robert L. Dudley, Melvin J. Dubnick, 2017-01-27 What students think they know about politics is often based on common myths Rather than dismissing

those myths as outright falsehoods this text encourages students to confront their preconceived notions in order to think critically about government and politics Clearly and distinctively woven into each chapter the myths and realities theme provides a pedagogical framework that engages students with interesting problems while effectively covering the core concepts of American government **Super Mad at Everything All the Time** Alison Dagnes,2019-03-11 Super Mad at Everything All the Time explores the polarization of American politics through the collapse of the space between politics and culture as bolstered by omnipresent media It seeks to explain this perfect storm of money technology and partisanship that has created two entirely separate news spheres a small enclosed circle for the right wing and a sprawling expanse for everyone else This leads to two sets of facts two narratives and two loudly divergent political sides with extraordinary anger all around Based on extensive interviews with leading media figures and politicians this book traces the development of the media machine giving suggestions on how to restore our national dialogue while defending our right to disagree agreeably

Abernathy,2017-01-03 Real People Real Stories Real Politics Politics involves people from many backgrounds struggling to make their voices heard Real people telling their stories reflect our ideals choices and collective experiences as a nation In American Government Stories of a Nation author Scott Abernathy tunes in to these voices showing how our diverse ideas shape the way we participate and behave the laws we live by and the challenges we face Each chapter features real stories illustrating how the American political system is the product of strategies calculations and miscalculations of countless individuals Students learn the nuts and bolts of political science through these compelling stories Learning concepts in context is a tested learning technique that works to help ideas stick The key concepts are memorable because they are tied to real politics where students see political action and political choices shaping how institutions advance or impede the fulfillment of fundamental ideas Not only will all students see themselves reflected in the pages but they will come to understand that they too are strategic players in American politics with voices that matter Just like the Full version The Essentials edition is perfect for instructors who don't wish to cover the last three chapters on policy

Profit Motive Charles Sauer, 2018-03-13 Most businesses are driven to maximize profit but what does this drive really mean in action In *Profit Motive* What Drives the Things We Do economist Charles Sauer makes the case that identifying your own and others Profit Motives provides the foundation for running a successful business being an effective leader a good consumer and getting what you really want out of life In this highly praised new treatise on economic behavior Sauer examines how businesses make decisions in pricing and employment and how the search for long term profit can mean adopting practices that may seem contrary to fundamental capitalist principles But the Profit Motive analysis goes well beyond the realm of finance and corporate decision making to explain how gaining a profit or a benefit is the motivating force behind an endless array of choices made by everyone from large organizations to individuals and their families and

everything in between The Ex-Human Michael Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare science fiction authors have conjured apocalyptic scenarios of human extinction Can such gloomy fates help us make sense of our contemporary crises How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape What other possible futures do narratives of the end of humanity allow us to imagine Michael Bérubé explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of Homo sapiens In a lively conversational style he considers novels by writers including Ursula K Le Guin Margaret Atwood Liu Cixin Philip K Dick and Octavia Butler as well as films that feature hostile artificial intelligence such as 2001 A Space Odyssey Blade Runner and the Terminator and Matrix franchises Bérubé argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human Though framed by the possibility of human extinction they are driven by a vision of the ex human a desire to imagine that another species is possible For all science fiction readers worried about the fate of humanity The Ex Human is an entertaining yet sobering account of how key novels and films envision the world without us Stable Condition Daniel J. Hopkins, 2023-03-23 The Affordable Care Act ACA the sweeping health care reform enacted by the Obama Administration in 2010 continues to be a contentious policy at the center of highly polarized political debates Both before and after the law's passage political elites on both sides of the issue attempted to sway public opinion through two traditional approaches messaging and policymaking itself They operated under the assumption that the public's personal experiences toward the law would make them more favorable Yet these tried and true methods have had limited influence on public attitudes toward the ACA Public opinion towards the ACA remained stable from 2010 to 2016 with more Americans opposing the law than supporting it It was only after Donald Trump was elected in 2016 and the prospect of the law being repealed became a reality that public opinion swung in favor of the ACA If traditional methods of influencing public opinion had little impact on attitudes towards the ACA what did In Stable Condition political scientist Daniel J Hopkins draws on survey data from 2009 to 2020 to assess how a variety of factors such as personal experience political messaging and partisanship did or did not affect public opinion on the ACA Hopkins finds that although personal experience with the ACA's Medicaid expansion increased favorability among low income Americans it did not have a broader overall impact on public opinion Personal experience with the Health Insurance Marketplace did not increase wider support for the ACA either Due to the complex nature of the law users of the Marketplace often did not realize they were benefiting from the ACA Therefore perceptions of the Marketplace were shaped by high profile issues with the enrollment website and opposition to the individual mandate These experiences ultimately offset one another resulting in little discernable change in public opinion overall Hopkins argues that political polarization was also responsible for elites' limited influence and that public opinion on the ACA was largely determined by partisanship and political affiliation Americans quickly aligned with their party's stance on the law and

were resistant to changing their beliefs despite the efforts of political elites Stable Condition is an illuminating examination of the limits of elites influence and the forces that shaped public opinion about the Affordable Care Act Almost Hollywood, Nearly New Orleans Vicki Mayer, 2017-02-24 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more Early in the twenty first century Louisiana one of the poorest states in the United States redirected millions in tax dollars from the public coffers in an effort to become the top location site globally for the production of Hollywood films and television series Why would lawmakers support such a policy Why would citizens accept the policy's uncomfortable effects on their economy and culture Almost Hollywood Nearly New Orleans addresses these questions through a study of the local and everyday experiences of the film economy in New Orleans Louisiana a city that has twice pursued the goal of becoming a movie production capital From the silent era to today's Hollywood South Vicki Mayer explains that the aura of a film economy is inseparable from a prevailing sense of home even as it changes that place irrevocably

The Hard State, Soft City of Singapore Simone Shu-Yeng Chung, Mike Douglass, 2025-10-01 With Singapore serving as the subject of exploration The Hard State Soft City of Singapore explores the purview of imaginative representations of the city Alongside the physical structures and associated practices that make up our lived environment and conceptualized space engineered into material form by bureaucrats experts and commercial interests a perceptual layer of space is conjured out of people's everyday life experiences While such imaginative projections may not be as tangible as its functional designations they are nonetheless equally vital and palpable The richness of its inhabitants memories aspirations and meaningful interpretations challenges the reduction of Singapore as a Generic City Taking the imaginative field as the point of departure the forms and modes of intellectual and creative articulations of Singapore's urban condition probe the resilience of cities and the people who reside in them through the images they convey or evoke as a means for collective expressions of human agency in placemaking
