

Straighterline American GOV Exam Questions and Answers 100% Pass

Which of the following describes socialism as practiced today in Sweden?

Select one:

- a. The government does not attempt to manage the overall economy, but owns a number of major industries and provides for people's basic economic needs.
- b. The government manages the overall economy through ownership of most major industries, and does not allow private property.
- c. The economy operates almost exclusively on private transactions.
- d. The government does little to manage the economy and owns no major industries, serving mainly to provide for people's basic economic needs.
- e. Firms are largely free to make their own production, distribution, and pricing decisions, and individuals depend largely on themselves for economic security. -

Correct Answer ✓✓ -a

What is a major limit on majoritarianism suggested by the text?

Select one:

- a. The public as a whole takes an interest in only a few of the hundreds of policy decisions that U.S. officials make each year.

American Government Straighterline Exam Study Guide

James Faber

American Government Straighterline Exam Study Guide:

Restoring the Promise Richard K. Vedder, 2019-05-01 Higher education in America is in crisis Costs are too high learning is too little and the payoff to students and society is increasingly problematic In *Restoring the Promise* Richard Vedder shows how the precarious position of colleges and universities results from a mostly unsuccessful expansion of governmental involvement in the academy especially at the federal level The book examines today's most serious issues in higher education including free speech and academic freedom tuition and other costs culture and curricula governance gender race and diversity due process admissions student loans and much more It diagnoses problems and identifies solutions For example the total cost of college per student in the United States is now higher than in any other country When combining the monetary costs of college with the opportunity costs of losing years of labor to the economy the true cost of higher education to American society well exceeds one trillion dollars annually Yet despite American higher education's immense price tag students are learning less than ever before and continue to be underemployed The book discusses the three I's of university reform information incentives and innovation Without information it is impossible for taxpayers and governing authorities to ensure that public education spending truly furthers the broader interests of society rather than the narrow interests of faculty and administrators Shaping incentives for management would help to reduce costs and improve quality Business practices such as Responsibility Centered Management RCM for example allow profit to motivate efficiency and encourage learning outcomes And expanding the use of innovation in technology and open online courses along with relinquishing old rules such as tenure and three month summer vacations offer new hope for institutions of higher education The book discusses such additional reforms as the following Ending or revising the federal student financial aid program Giving departments or even professors a share of overall revenue based on student enrollments in their classes Departments or professors would then be required to pay their share of travel building rental maintenance utilities and other such costs from the revenues they receive Providing earnings data on former students by college five ten or fifteen years after matriculation Prospective students and parents as well as lawmakers and oversight officials would be assisted regarding school successes and failures Increasing faculty teaching loads Instituting three year degrees and year round instruction Ending discrimination against for profit schools Ending grade inflation Ending speech codes and other barriers to academic freedom Ending affirmative action and related diversity programs And more

Higher Education Outcomes Assessment for the Twenty-First Century Peter Hemon, Robert E. Dugan, Candy Schwartz, 2013-05-09 This book discusses recent trends in outcomes assessment examines how state governments are reshaping the national discussion with higher education and explains how libraries must respond to these changes *Higher Education Outcomes Assessment for the Twenty first Century* focuses on recent developments in outcomes assessment especially from the perspectives of the federal government and state governments as well as foundations concerned about the state of higher education The authors identify the significant

changes that these stakeholders call for information that academic librarians and anyone following outcomes assessment need to be aware of and interpret the discussions to identify implications for libraries Building upon the foundation of knowledge presented in the previous two Libraries Unlimited Outcomes Assessment in Higher Education titles this book provides readers with up to date coverage of topics such as the emerging metrics used to define student and institutional success the increased importance of accountability and the need to compare and assess the performance of programs and institutions rather than individual courses and the shift in prioritizing student outcomes over student learning outcomes The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit
