Diseased Cinema Robert Alpert, Merle Eisenberg, Lee Mordechai, 2023-09-29 Discusses how the depiction of diseases in movies has changed over the last century and what these changes reveal about American culture Examines disease movies as a genre that has emerged over the last century and includes pandemic and zombie films Reveals the changes to the genre's narratives over three broad time periods the beginning of film through the 1980s the 1990s through the mid 2000s and the late 2000s and afterward Investigates the evolution of disease movies through three perspectives historically notable films remakes and franchises Analyses disease movies in the context of the development of American global capitalism and the fragmentation of the social contract Explains the role of disease movie narratives in the American experience of Covid American movies about infectious diseases have reflected and driven dominant cultural narratives during the past century These movies both real pandemics and imagined zombie outbreaks have become wildly popular since the beginning of the 21st century They have shifted from featuring a contained outbreak to an imagined containment of a known disease to a globalized uncontrollable pandemic of an unknown origin Movie narratives have changed from identifying and solving social problems to a despair and acceptance of America's failure to fulfil its historic social contract Movies reflect and drive developments in American capitalism that increasingly advocates for individuals and their families rather than communities and the public good Disease movies today minimize human differences and envisage a utopian new world order to advance the needs of contemporary American capitalism These movie narratives shaped reactions to the outbreak of Covid and reinforced individual responsibility as the solution to end the pandemic

COVID-19 Pandemic Impact on New Economy Development and Societal Change Popescu, Cristina Raluca Gh., 2021-12-17. Globalization and technological advances have the immense power to create a new economy, address sustainability concerns, and facilitate societal changes. In addition, the COVID-19 pandemic has led to notable modifications in the world economy and society that require adjustments to business models as well as our way of life. It is critical to understand these new models in our changing society for businesses to not only survive but to thrive. *COVID-19 Pandemic Impact on New Economy Development and Societal Change* provides an updated view of the newest trends, novel practices, and latest tendencies concerning the manner of shaping the new economy and accelerating societal change, demonstrating the crucial importance of rethinking the world's models, priorities, and strategies while seeking a more responsible path for humanity. Covering topics such as tourism and salesmanship skills, this publication is ideal for academicians, researchers, scientists, scholars, practitioners, industry professionals, consultants, instructors, and students.

The Sociocultural Context of Psychosocial Interventions Francisco José Eiroa-Orosa, Tim Lomas, Michael Rowe, 2018-12-06. Across diverse academic fields, scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life. Indeed, such is the apparent efficacy of such interventions that there are many policy-led initiatives to implement these at national and international scales. However, few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions, i.e., considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socioeconomics. The aim of the Research Topic *The Sociocultural Context of Psychosocial Interventions* was to address this lacuna. As such, we tried to help bring a more contextual mindset to the implementation of health and wellbeing interventions. This may help to shift the way such interventions are designed and implemented both at a granular, local level, i.e., influencing individual practitioners, and at a large-scale, macro level, e.g., influencing policy makers. Themes within this Research Topic have concerned both macro-sociocultural as well as meso and micro layers and the peculiarities of implementing real-world research based on these levels. There has been room for physical and mental health, for family relationships, for educational contexts, and even for the effects of crime. Some works have included interesting methodological discussions on the integration of different ecological layers or the modal distribution of our interests. For us, it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion. Rather, these considerations seriously affect the ability of practitioners to really reach the people who need their interventions, listening to their needs and respecting their preferences. For the editors of this book, then, the contextualization of interventions means considering the people who receive them as full citizens immersed in complex

societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation
