weight and obesity The chapters cover a wide spectrum of topics and employ a variety of applied techniques across a range of countries Some of the issues explored include the relationship between childhood obesity and food insecurity adolescent weight gain and social networks obesity and happiness the relationship between fast food and obesity tobacco control race and gender differences and consumer health This book is a compilation of articles originally published in the journals *Applied Economics* and *Applied Economics Letters* Extended Curriculum Programmes Tennyson Mngutshini,2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector *Pinning Down the Past* Mike Corbishley,2014-04-17 In a relatively short period of time the pursuit of archaeology has evolved from an antiquarian interest to a specialised scientific activity Part of this evolution has always included the interest of the public and archaeologists efforts to educate them As each new method and technique is developed and each new specialism is created the challenge of making archaeology available as a learning resource grows with it Today for example the issues which surround archaeology and heritage such as the pressures of tourism on sites now form part of many formal educational curricula This book the first to deal with the subject in such depth examines the place of education and outreach within the wider archaeological community Written by one of Britain's leading archaeological educationalists it charts the sometimes difficult and painful growth and development of education and archaeology Packed full of informative and enlightening case studies from the circus at Colchester to Sutton Hoo and Hadrian's Wall this work examines exactly how we have reached the point we are at where that place is and suggests areas for future development By drawing upon many decades of experience at the front line of archaeological education the author has produced a key text that will play a major role in the on going development of the heritage industry Publisher's website **Encyclopedia of Information Science and Technology** Mehdi Khosrow-Pour,Mehdi Khosrowpour,2009 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher *The Times Index* ,2009 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement South Africa Yearbook ,2009
