A building is defined as a structure that is permanently attached to the land, has a roof, is partially or completely enclosed by walls, and is not intended to be mobile.

Building improvements are defined as capital events that increase the value of a building, materially extend the useful life of a building, or both. A building improvement should be capitalized as a sub-asset of the building and recorded as an addition of value to the existing building if the expenditure for the improvement is at the capitalization threshold and the expenditure increases the life or value of the building by 25 percent of the original life period or cost.

Examples of expenditures to be capitalized as buildings

- Professional fees (sales commission, legal, architect, inspection, appraisal, title search, etc.).
- Payment of unpaid or accrued taxes on the building at the date of purchase

- Cost of excavation or grading or filling of land *for a specific building*
- Expenses incurred for the preparation of plans, specifications, blueprints, etc.
- Cost of building permits
- Professional fees (architect, engineer, management fees for design and supervision, legal)

**Note:** Architect and Engineering fees are **expensed** if a decision is made to **not** proceed with the construction of the building.

- Costs of temporary buildings used during and for the construction
- Unanticipated costs such as rock blasting or relocation of an underground stream channel

Examples of Expenditures to be capitalized as Building Improvements:
