Mind Maps *Designing Assessment for Quality Learning* Claire Wyatt-Smith,Valentina Klenowski,Peta Colbert,2014-03-10
This book brings together internationally recognised scholars with an interest in how to use the power of assessment to
improve student learning and to engage with accountability priorities at both national and global levels It includes
distinguished writers who have worked together for some two decades to shift the assessment paradigm from a dominant
focus on assessment as measurement towards assessment as central to efforts to improve learning These writers have
worked with the teaching profession and in so doing have researched and generated key insights into different ways of
understanding assessment and its relationship to learning The volume contributes to the theorising of assessment in contexts
characterised by heightened accountability requirements and constant change The book s structure and content reflect
already significant and growing international interest in assessment as contextualised practice as well as theories of learning
and teaching that underpin and drive particular assessment approaches Learning theories and practices assessment
literacies teachers responsibilities in assessment the role of leadership and assessment futures are the organisers within the
book s structure and content The contributors to this book have in common the view that quality assessment and quality
learning and teaching are integrally related Another shared view is that the alignment of assessment with curriculum
teaching and learning is linchpin to efforts to improve both learning opportunities and outcomes for all Essentially the book
presents new perspectives on the enabling power of assessment In so doing the writers recognise that validity and reliability
the traditional canons of assessment remain foundational and therefore necessary However they are not of themselves
sufficient for quality education The book argues that assessment needs to be radically reconsidered in the context of
unprecedented societal change Increasingly communities are segregating more by wealth with clear signs of social political
economic and environmental instability These changes raise important issues relating to ethics and equity taken to be core
dimensions in enabling the power of assessment to contribute to quality learning for all This book offers readers new
knowledge about how assessment can be used to re engage learners across all phases of education STEM: Innovation on
