Aisc Steel Detailing Manual:

Steel Detailers' Manual Alan Hayward, Frank Weare, A. C. Oakhill, 2011-03-01 This highly illustrated manual provides practical guidance on structural steelwork detailing. It describes the common structural shapes in use and how they are joined to form members and complete structures. It explains detailing practice and conventions, provides detailing data for standard sections, bolts and welds, emphasises the importance of tolerances in order to achieve proper site fit up, discusses the important link between good detailing and construction costs. Examples of structures include single and multi storey buildings, towers and bridges. The detailing shown will be suitable in principle for fabrication and erection in many countries and the sizes shown will act as a guide to preliminary design. The third edition has been revised to take account of the new Eurocodes on structural steel work together with their National Annexes. The new edition also takes account of developments in 3 D modelling techniques and it includes more CAD standard library details.

SP-66(04): ACI Detailing Manual-2004 , Steel Detailers Manual Alan Hayward, Frank Weare, 1993-01-18 In the past detailing for steel structures was often left to the fabricator. Now however engineers realise that the viability and safety of steel structures depend on good detailing which allows for economical fabrication and final erection. This highly illustrated manual is the first book to provide a comprehensive introduction to steel details. It explains detailing practice and conventions, includes detailing data for standard sections, bolts and welds and covers a wide range of structures including single and multi storey buildings, towers and bridges.

Architect's Handbook of Construction Detailing David Kent Ballast, 2009-06-22 Significantly updated with revisions to nearly all 200 plus details, this second edition of Architect's Handbook of Construction Detailing provides architects, engineers, interior designers, contractors and other building professionals with all of the common construction details, materials information and detailing concepts used throughout the industry. The information can be used as is or modified to fit individual project designs. Each of the book's seven sections is formatted to follow the new six digit CSI MasterFormat system. It contains details and related information including descriptions, detailing considerations, material requirements, installation requirements, tolerance coordination and likely failure points. Additionally, SI metric equivalents have been added to all
