THE SECRET OF EASTER ISLAND

by the author of KON-TIKI

FIRST REVIEWS: "Just as enthralling and illuminating to read as *Kon-Tiki* . . . Not only a gripping adventure story, but a suspenseful feat in scientific detection as well. It held me fascinated from first page to last, not least for the remarkable color photographs that illustrate the narrative."

— JOHN BARKHAM, *Saturday Review Syndicate*

"An advance reading of the 424 page book, with its 62 photographs in full color, led this observer to mounting enthusiasm over its excitement, suspense, and even humor."

— FREDERIC BARBOCK, in "*Among the Authors*,"
Chicago Tribune

"A thrilling book of romance, research and discovery." — DANIEL A. POLING,

Christian Herald

The #1 New York Times Bestseller John Bear,1992 Lists hundreds of books that have made the famous list and offers facts about the publishing industry authors and the list itself Pre-Columbian Trans-Oceanic Contact Jerald Fritzinger,2016-03-14 Pre Columbian Trans Oceanic Contact examines the discovery and settlement of The New World hundreds and even thousands of years before Christopher Columbus was born **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1959 Includes Part 1 Number 2 Books and Pamphlets Including Serials and Contributions to Periodicals July December **The Myth of the Natural Laboratory** Adrian Young,2025-12-31 Outsiders have construed Pitcairn and Norfolk Islands as isolated natural laboratories since the nineteenth century The islands inhabitants descended from the eighteenth century mutineers of the British naval vessel Bounty and their partners from Tahiti Tubuai Huahine and Raiatea have long been idealized by investigators as incomparable research subjects uniquely suited for the study of racial cultural and linguistic hybridity But how did these two Pacific islands come to be seen as natural experiments in the first place How was that idea shaped and contested in encounters between knowledge makers and the people they studied And how can we dismantle the myth of the Pacific Island as human laboratory today The Myth of the Natural Laboratory answers these questions by tracing two centuries of interest in both of these communities Across chapters on sailors colonial administrators anthropologists historians and linguists it critically historicizes the trope of the island as laboratory and argues for more critical examination of colonial science s reliance on Indigenous subjects Over time Pitcairn and Norfolk Islanders became on a per capita basis among the most studied people on earth often subject to dozens of investigations across their lifetimes to the point that they were sometimes accused by their investigators of being more expert in fieldwork than the fieldworkers who came to study them They inflected the ways investigations proceeded on both islands and leveraged the interest in their communities to stake their own claims and produce their own counternarratives Almost without exception researchers failed to acquire or produce the knowledge they sought This book suggests that far from becoming ideal natural experiments producing easily accessible knowledge both islands ultimately became sites of epistemic derangement places where attempts to produce knowledge were halted redirected or reconfigured Bringing recent conversations on imperial anxiety to bear on questions of science and empire Adrian Young studies these fractures and failures to produce knowledge showing the ways colonial paranoid and colonial histories deranged studiers practices categories and assumptions *American Library & Book Trade Annual* ,1959 **National Union Catalog** ,1970 Includes entries for maps and atlases *The Bowker Annual of Library and Book Trade Information* ,1959 **Pitcairn Island, the Bounty Mutineers, and Their Descendants** Robert W. Kirk,2008 The infamous Bounty mutiny of 1790 culminated in nine mutineers taking up residence on the small Pitcairn Island in the South Pacific Rivalry over Polynesian women soon led to homicidal strife and by 1808 when American sealing vessel Topaz stopped at the island John Adams was the only mutineer

alive He however headed what was soon discovered to be a utopianlike Christian society Beginning with a background look at the circumstances surrounding the mutiny this volume contains a detailed history of the Pitcairn islanders from the original settlement through the opening years of the 21st century The island s isolation is contrasted with the international attention garnered from its captivating history making the society a one of a kind historical conundrum Unlike previous volumes this history takes a look at the Pitcairn Island of the 20th and 21st centuries examining such subjects as the effect of the World War II and the 2004 sexual abuse trial and conviction of six Pitcairners Helpful maps and photographs enhance the reader s experience

Global Rhetorics of Science Lynda C. Olman,2023-09-01 With this volume the field of rhetoric of science joins its sister disciplines in history and philosophy in challenging the dominance of Euro American science as a global epistemology The discipline of rhetoric understands world making and community building as interdependent activities that is if we practice science differently we do politics differently and vice versa This wider aperture seems crucial at a time when we are confronted with the limitations of Euro American science and politics in managing global risks such as pandemics and climate change particularly in our most vulnerable communities The contributors to this volume draw on their familiarity with a wide range of global scientific traditions from Australian Aboriginal ecology to West African medicine to Polynesian navigation science to suggest possibilities for reconfiguring the relationship between science and politics to better manage global risks These possibilities should not only inspire scholars in rhetoric and technical communication but should also introduce readers from science and technology studies to some useful new approaches to the problem of decolonizing scenes of scientific practice around the world
