the governing chains having been challenged with some researchers considering the chain to be broken However the view that comes to the fore in this book is that the chain is still present and contains both vertical implementation structures and intervening spaces for policy interpretation How schools become successful is important for the individual students as well as the local community and the national state A vast quantity of research has looked at what happens in schools and classrooms At the same time national governance and politics as well as local prerequisites are known to exert influence on schools and their results to a high degree Societal priorities problems and traditions provide variety in how governance is executed This book provides an international overview of the similarities and differences between educational agencies and how their work influences schools

Assessment in Education Shelleyann Scott,Donald E. Scott,Charles F. Webber,2015-10-20 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice Given the highly politicised nature of assessment it addresses leaders and aspiring leaders who are open to being challenged willing to explore controversy and capable of engaging in informed critical discourse The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice Collectively the chapters highlight important assessment purposes and models including intended and unintended effects of assessment in a globalised context The book provides opportunities to explore cultural similarities and particularities It invites readers to challenge taken for granted assumptions about ourselves and colleagues in other settings The chapters highlight the cultural clashes that may occur when cross cultural borrowing of assessment strategies policies and tools takes place However authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems Readers will encounter challenges from authors to deconstruct their assessment values beliefs and preconceptions Indeed one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance

Webber,2015-10-20 This book provides pragmatic strategies and models for student assessment and ameliorates the heightened sense of confusion that too many educators and leaders experience around the complexities associated with assessment In particular it offers guidance to school and district personnel charged with fair and appropriate assessment of students who represent a wide variety of abilities and cultures Chapters focus on issues that directly impact the educational lives of teachers students parents and caregivers Importantly the confluence of assessment practices and community expectations also are highlighted Assessment is highly politicised in contemporary society and this book will both confirm and challenge readers beliefs and practices Indeed discerning readers will understand that the chapters offer them a bridge from many established assessment paradigms to pragmatic ethical solutions that align with current expectations for schools and districts In Part One readers engage with concepts and skills needed by school learning leaders to guide optimal

assessment practices Part Two delves into student assessment within and across disciplines Part Three provides pragmatic approaches that address assessment in the context of inclusive intercultural education pluralism and globalisation

Minority Communities Michael D. Behiels, 2004-03-10 Convinced that education was one of the essential keys to the renewal and growth of their communities revitalized Francophone organizations and leaders lobbied for constitutional entrenchment of official bilingualism and of a mandated Charter right to education in their own language including the right to governance over their own schools and school boards Having achieved their objectives in the 1982 Charter of Rights and Freedoms Francophone provincial and national leaders learned the techniques of micro constitutional politics to convince the Ontario Alberta and Manitoba provincial governments to implement full and unfettered school governance by and for Francophone minority communities These communities received the backing of Canada's Supreme Court which gave a collectivist and remedial interpretation to the Charter's official language minority education rights section 23 The Canadian government assisted the Francophone minority in two ways it made funds available to Francophone organizations and parents via the Court Challenges program and it signed lucrative financial agreements with the provinces to help defray the additional costs of establishing French language schools and school boards While the Francophone minority communities were pursuing implementation of their section 23 Charter rights they found themselves drawn into the mega constitutional negotiations and ratification procedures surrounding the controversial Meech Lake Constitutional Accord 1987-90 and the omnibus Charlottetown Consensus Report 1990-92 During the Quebec Provincial Round their Charter rights remained intact when the Meech Lake Accord failed to obtain ratification During the Canada Round they managed to obtain recognition of their conception of a pan Canadian cultural and linguistic duality which helped minimize the constitutional and political impact of the Quebec government's insistence upon a territorial conception of duality that is an asymmetrical Canada Quebec federation When Canadians rejected the Charlottetown deal neither conception achieved formal constitutional recognition

Nevertheless Canada's Francophone minority communities were regenerated by the intertwined developments of constitutional renewal and their winning of school governance. A new vigorous Francophone pan-Canadian national community emerged, one capable of ensuring the survival of its constituents' communities well into the twenty-first century.
