

Concept and Treatment of Alcohol Abuse

✓ Exclusively available on IvyPanda

Background

Alcoholism is a behavior arising from physical addiction to alcohol by an individual. A victim of alcoholism will continue to drink despite experiencing health problems that may be physical, social or mental. Alcoholism is different from alcohol abuse since alcohol abuse describes a situation where drinking may result from problems emanating from the act of alcoholism, it is more behavioral than physical addiction (PubMed Health, 2011).

Alcoholism is a disorder in which an individual takes alcohol despite being aware that it will ruin their lives. Alcoholics cause several problems with the people who are close to them, and they demonstrate some sense of irresponsible behaviors, for instance, by abandoning school or jobs. Alcoholism results from several years of alcohol drinking and it worsens further with more drinking.

When alcoholism is not treated, it will likely destroy the emotional and physical well being of an individual; extreme alcoholism might even lead to death. Alcoholism is a family disease since it hurts and directly and indirectly affects the lives of victim's family members and the people who are close to the alcoholic person (Cleveland Clinic, 2010).

People drinking alcohol do not always have knowledge of when alcohol drinking gets out of hand. The problems of alcoholism may be mind as well as life threatening, and they affect the individual, family and the society. Alcoholism is the taking of alcoholic beverages to an extent that it can interfere with the physical behavior and activities of the alcoholic person (Gifford, 2009).

Thesis

Alcohol is a widely used and an accepted psychoactive drug that disrupts the neurochemistry in the brain causing emotional, social, behavioral, spiritual and vocational problems.
