engineers and professionals who are interested in associated areas The book is written by international scientists with expertise in chemistry protein biochemistry enzymology molecular biology and genetics many of which are active in biochemical and biomedical research We hope that the book will enhance the knowledge of scientists in the complexities of some biotechnological approaches it will stimulate both professionals and students to dedicate part of their future research in understanding relevant mechanisms and applications

Biotechnology: Bridging Research and Applications Daphne Kamely,A.M. Chakrabarty,Steven E. Kornguth,2012-12-06 Biotechnology is advancing at a rapid pace with numerous applications in medicine industry agriculture and environmental remediation Recognizing this government industrial and academic research and development investment in biotechnology has expanded rapidly The past decade has seen the emergence of applications of this technology with a dual use potential Military applications focus on four major areas biomedical technology such as vaccine development and medical diagnostics detection of toxins chemicals and pathogens material biotechnology and biological decontamination including biodegradation and bioremediation This conference emphasizes the non medical applications of biotechnology The first two sessions focus on the synthesis and properties of molecules that may be used in detectors The traditional approach to detection of chemical and biological agents relied on the development of specific assays or analyses for known agents Advances in molecular biology have made possible the production of large quantities of toxins which were previously available in minute quantities and the molecular engineering of toxins and pathogens with specific pharmacologic and physical chemical properties In addition to the traditional approaches to detection of specific known compounds biotechnology now offers generic approaches to detection Physiological targets known as receptors are primary targets for many drugs and toxins Similarly pathogens rely on receptors to gain access to cells These receptors function as sensitive detectors generating signals which are transduced and amplified

Biodesign in high schools Giovanna Danies Turano,María Paula Barón Aristizábal,Andrea Peralta Mejía,Andrea Forero Cañizares,Jenny Grillo Naranjo,2023-07-18 Traditional education which is mainly based on evaluating theoretical content at the end of a course is not in keeping with the skillset we require in the twenty first century Today we need creative and innovative individuals who can think critically who are capable of learning to learn and who have complex problem solving skills We need people who can work collaboratively using transdisciplinary communication skills We need citizens who are aware of local needs but have a global vision They must make decisions not only based on their own well being but also in the best interests of the community and the planet They must understand that the solution requires a balance People can acquire these skills through design thinking which builds the learning process by carrying out projects and theorizes based on set challenges Biodesign for High Schools is a pedagogical proposal that combines scientific topics with a creative approach it offers a plethora of possibilities to prepare future high school graduates to respond to the needs of today's world
