publication in this book **Advanced Aircraft Flight Performance** Antonio Filippone, 2012-12-17 This book discusses aircraft flight performance focusing on commercial aircraft but also considering examples of high performance military aircraft The framework is a multidisciplinary engineering analysis fully supported by flight simulation with software validation at several levels The book covers topics such as geometrical configurations configuration aerodynamics and determination of aerodynamic derivatives weight engineering propulsion systems gas turbine engines and propellers aircraft trim flight envelopes mission analysis trajectory optimisation aircraft noise noise trajectories and analysis of environmental performance A unique feature of this book is the discussion and analysis of the environmental performance of the aircraft focusing on topics such as aircraft noise and carbon dioxide emissions **Facing the Unexpected in Flight** Jean

Pinet, 2015-10-28 Airline pilots often have to face sudden unexpected situations that can become potentially dangerous They are trained to deal with these situations but sometimes the lack of time before the situation deteriorates and the associated stress can compromise their basic cognitive sequence and lead to a serious incident or even an accident This book identifies common denominators in pilots reactions to dangerous unexpected events and highlights behavior common to all in complex stressful situations Facing the Unexpected in Flight Human Limitations and Interaction with Technology attempts to clarify the human characteristics at play in stressful situations with the goal of providing a more solid basis for designing aeronautical operating equipment and shaping future automation The book applies an original cognitive analysis method to highlight actual operational behavior within a quick succession of short mental segments lasting less than one minute in all This rational method of assessing human potential should contribute to a more effective distribution of roles and help to optimize the pilot aircraft interface The current drive towards total automation together with the drone revolution and questions of cost effectiveness within a global economy raises the question of whether there is a need for pilots onboard aircraft So after scientifically dissecting human limitations and advantages in terms of flying an aircraft the book concludes with reflections by the author on the possibility and implications of eliminating pilots from aircraft In this section the author sets aside scientific rigor and provides his sometimes subjective personal opinions on the professional future of airline pilots

Federal Register, 2013-05 **Just Culture and the Criminalisation of Air Accidents** Simon Daniels, 2024-12-30 Just Culture and the Criminalisation of Air Accidents equips the reader with the tools to understand the meaning of criminalisation in the civil aviation industry It enables them to resolve problems that arise in risk management within the context of their professional employment By examining the priorities of pilots air traffic controllers and prosecutors this book analyses the anatomy of criminalisation in civil aviation and works towards constructing solutions that protect the professionals human rights and the Just Culture concept within the framework of criminal law and practice It covers the duty of an air traffic controller to take the standard of care to guard against acts or omissions which might cause loss and give rise to a claim in negligence The book illustrates the critical features discussed with numerous case studies from States and

jurisdictions around the world The book will benefit airline operators pilots air traffic controllers or managers and aviation business managers

Organizational Resilience D. Christopher Kayes, 2015 In the age of knowledge organizations survive and thrive only when they learn All too often when organizations are confronted with novel or changing situations the process of learning breaks down and the result is catastrophic In *Organizational Resilience How Learning Sustains Organizations in Crisis* Disaster and Breakdown D Christopher Kayes explains why all organizational leaders should be concerned about learning and the dire consequences that may ensue if they are not Kayes draws on the foundational ideas of philosopher John Dewey then connects this philosophy to contemporary studies on learning management and organizations Through a wide range of examples from the realms of government finance engineering healthcare and commercial air travel he describes how learning can help organizations weather crises and outlines specific ways that leaders can learn from their experience The first comprehensive review of how learning sustains organizations in challenging times *Organizational Resilience* is essential reading for crisis managers disaster recovery team leaders continuity of operations planning professionals emergency management professionals and leaders at all levels who want their organizations to thrive

Advanced Approach Light System Behrend, Ferdinand, 2017-08-25 The constant growth in aviation requires the introduction of new technologies in order to meet the demand for increasing capacity Especially the airport often represents the limiting factor Poor visibility conditions and an insufficiently equipped ground infrastructure regarding navigation facilities can lead to restrictions in maintaining the prevailing traffic flow especially during the approaches The conventional instrument landing system consists of numerous technical components which are causing expenses regarding maintenance and operation Smaller airports are often only partially or not at all equipped with the appropriate ground facilities This can bring air traffic to a total halt during certain visibility conditions New satellite based approach procedures offer the possibility to keep up air traffic even during poor visibility conditions regardless of the ground infrastructure required in the past These also offer now a barometric guidance or an augmented satellite signal for the vertical flight guidance component With the use of these approach procedures there is however the possibility of new faults and errors of the vertical flight guidance signal In a system based on electromagnetic radio waves a fault is angular meaning if the airplane gets nearer to the transmitter on ground the absolute possible failure of the target approach path gets smaller In a satellite based approach on the other hand it is constant during the whole approach The result can be a great deviation from the target approach path even just before reaching the runway threshold Often only after reaching the decision height and the herewith connected visual contact to corresponding ground features these faults can be recognized during poor visibility conditions close to the minima of a precision approach flight The larger the absolute error to the target approach path the more crucial it gets to initiate a missed approach procedure and therefore preventing a drop out of the relevant obstacle clearance limit Research has shown that through the currently present visual characteristics of the approach lighting system the actual position

cannot be determined sufficiently regarding the runway threshold and the target approach path in order to estimate the decision height correctly. The here presented Advanced Approach Light System is supposed to be an additional visual aid in order to support the cockpit crew in its decisions. Therefore it should amount to improve the awareness of the situation regarding constant vertical faults. The new navigation lighting system has been integrated into a flight simulator and was tested by licensed airline pilots within two test series with varying visibility conditions and decision heights. Next to basic functionality, operational usability in existing procedures of practical routines in the cockpit has been evaluated. The results of the test series have demonstrated a significant improvement in identifying vertical faults with the support of the Advanced Approach Light System. The decision to initiate a missed approach was made immediate and prompt and therefore the airplane stayed within the obstacle clearance limit even in a low decision height. In contrast, the trial participants without the new system took reluctant and often far too late decisions which lead to a drop out of the obstacle clearance limit. The Advanced Approach Lighting System has significantly improved the situation awareness for pilots in command in recognizing vertical faults when reaching the decision height. The integration in existing work routines and its operative use happened flawlessly and was highly accepted by the trial participants.

Das stetige Wachstum in der Luftfahrt erfordert die Einführung neuer Technologien, um der Nachfrage nach steigender Kapazität gerecht zu werden. Insbesondere das System Flughafen stellt hierbei oftmals den limitierenden Faktor dar. Schlechte Sichtbedingungen und die unzureichende bodenseitige Ausrüstung mit Navigationseinrichtungen können für Einschränkungen in der Aufrechterhaltung des bestehenden Verkehrsflusses sorgen, insbesondere bei Landeanflügen. Das konventionelle Instrumentenlandesystem besteht aus einer Vielzahl an technischer Komponenten, die hohen Aufwand hinsichtlich Wartung und Betrieb verursachen. Kleine Flughäfen sind oft nur teilweise oder gar nicht mit den entsprechenden Bodenkomponenten ausgerüstet, so dass der Flugbetrieb bei bestimmten Sichtbedingungen vollständig eingestellt werden muss. Neue satellitengestützte Anflugverfahren bieten die Möglichkeit, den Flugbetrieb auch bei schlechten Sichtbedingungen aufrechtzuerhalten, unabhängig von der bisher notwendigen Bodeninfrastruktur. Diese bieten mittlerweile ebenso eine auf der barometrischen Höhenmessung oder einem aufgewerteten Satellitensignal basierende vertikale Flugführungskomponente. Allerdings besteht mit der Verwendung entsprechender Anflugverfahren auch eine neue mögliche Fehlercharakteristik des vertikalen Flugführungssignals. Ist ein Fehler beim auf elektromagnetischen Funkwellen basierenden Instrumentenlandesystem winkelförmig, dehnt sich das Luftfahrzeug dem Sender am Boden nähert, umso kleiner wird die absolute Ablage zum Sollanflugweg. Ist dieser bei satellitengestützten Anflügen konstant, beruht der gesamte Endanflug auf einer großen Abweichung vom Sollanflugweg, auch kurz vor Erreichen der Landebahnschwelle. Kann die Folge sein, bei schlechten Sichtbedingungen nahe den Minima eines Präzisionsanfluges kann der Fehler oft erst bei Erreichen der Entscheidungshöhe und dem damit verbundenen visuellen Kontakt zu entsprechenden Bodenmerkmalen erkannt werden. Je größer die Ablage zum Sollanflugweg, umso entscheidender ist das unverzügliche Einleiten

des Fehlanflugs um ein Verlassen der entsprechenden Hindernisfreibereiche zu verhindern. Untersuchungen haben gezeigt, dass die aktuell vorhandenen visuellen Merkmale der Anflugbefeuerung nicht ausreichend sein können. Die tatsächliche Position bezüglich der Landebahnschwelle und des Sollanflugweges bei Erreichen der Entscheidungshöhe einzuschätzen. Das hier vorgestellte Advanced Approach Light System soll die Cockpitbesatzung als zusätzliches visuelles Merkmal bei der Entscheidung unterstützen und so zur Verbesserung des Situationsbewusstseins hinsichtlich konstanter vertikaler Fehler beitragen. Das neue Befeuerungssystem wurde in einen Flugsimulator integriert und innerhalb zweier Versuchsreihen mit unterschiedlichen Sichtbedingungen und Entscheidungshöhen von lizenzierten Verkehrspiloten getestet. Dabei sollte neben der grundsätzlichen Funktionalität auch die operative Einsetzbarkeit in den bestehenden Ablauf der Handlungsrouinen im Cockpit untersucht werden. Die Ergebnisse der Versuchsreihen haben eine erhebliche Verbesserung im Erkennen vertikaler Fehler mit Hilfe des Advanced Approach Light System aufgezeigt. Die Entscheidung zum Einleiten des Fehlanflugs erfolgte direkt und unverzüglich, wodurch das Luftfahrzeug auch bei sehr niedriger Entscheidungshöhe noch innerhalb des Hindernisfreibereiches blieb. Im Gegensatz dazu wurde bei den Versuchsteilnehmern denen nicht das neue System zur Verfügung stand, die Entscheidung eher zögerlich und oftmals viel zu spät getroffen, was zu einem Verlassen des Hindernisfreibereiches führte. Das Situationsbewusstsein der Luftfahrzeugführer zum Erkennen vertikaler Fehler beim Erreichen der Entscheidungshöhe wurde durch das Advanced Approach Light System wesentlich erhöht. Die Integration in bestehende Arbeitsrouinen und der operative Einsatz erfolgten bei hoher Akzeptanz problemlos durch die Versuchsteilnehmer.

Information Ergonomics Michael Stein, Peter Sandl, 2012-03-30. The variety and increasing availability of hypermedia information systems which are used in stationary applications like operators consoles as well as mobile systems e.g. driver information and navigation systems in automobiles form a foundation for the mediatization of the society. From the human engineering point of view this development and the ensuing increased importance of information systems for economic and private needs require careful deliberation of the derivation and application of ergonomics methods particularly in the field of information systems. This book consists of two closely intertwined parts. The first theoretical part defines the concept of an information system followed by an explanation of action regulation as well as cognitive theories to describe man information system interaction. A comprehensive description of information ergonomics concludes the theoretical approach. In the second practically oriented part of this book authors from industry as well as from academic institutes illustrate the variety of current information systems taken from different fields of transportation i.e. aviation, automotive and railroad. The reader thus gains an overview of various applications and their context of use as well as similarities and differences in design. This does not only include a description of the different information systems but also places them in the context of the theories and models which were presented in the first part of this book.
