Alchemy And Chemistry In The 16th And 17th Centuries:

Alchemy and Chemistry in the 16th and 17th Centuries P. Rattansi, Antonio Clericuzio, 2013-03-07 The present volume owes its origin to a Colloquium on Alchemy and Chemistry in the Sixteenth and Seventeenth Centuries held at the Warburg Institute on 26th and 27th July 1989 The Colloquium focused on a number of selected themes during a closely defined chronological interval on the relation of alchemy and chemistry to medicine philosophy religion and to the corpuscular philosophy in the sixteenth and seventeenth centuries The relations between Medicina and alchemy in the Lullian treatises were examined in the opening paper by Michela Pereira based on researches on unpublished manuscript sources in the period between the 14th and 17th centuries It is several decades since the researches of R F Multhauf gave a prominent role to Johannes de Rupescissa in linking medicine and alchemy through the concept of a quinta essentia Michela Pereira explores the significance of the Lullian tradition in this development and draws attention to the fact that the early Paracelsians had themselves recognized a family resemblance between the works of Paracelsus and Roger Bacon's scientia experimentalis and indeed a continuity with the Lullian tradition

Theory Choice in the History of Chemical Practices

Emma Tobin, Chiara Ambrosio, 2016-05-26 This collection of essays examines the question of theory from the perspective of the history of chemistry Through the lens of a number of different periods the authors provide a historical analysis of the question of theory in the history of chemical practice The consensus picture that emerges is that the history of science tells us a much more complex story about theory choice A glimpse at scientific practice at the time shows that different competing as well as non competing theories were used in the context of the scientific practice at the various times and sometimes played a pivotal pedagogical role in training the next generation of chemists This brief brings together a history of chemical practice and in so doing reveals that theory choice is conceptually more problematic than was originally conceived This volume was produced as part of the Ad HOC chemistry research group hosted by University College London and University of Cambridge

The Impact of the Kabbalah in the Seventeenth Century Allison P. Coudert, 2023-08-14 If he had lived among the Greeks he would now be numbered among the stars So wrote Gottfried Wilhelm Leibniz in his epitaph for Francis Mercury van Helmont Leibniz was not the only contemporary to admire and respect van Helmont but although famous in his own day he has been virtually ignored by modern historians Yet his views influenced Leibniz contributed to the development of modern science and fostered the kind of ecumenicalism that made the concept of toleration conceivable The progressive nature of van Helmont's thought was based on his deep commitment to the esoteric doctrines of the Lurianic Kabbalah With his friend Christian Knorr von Rosenroth van Helmont edited the Kabbala Denudata 1677 1684 the largest collection of Lurianic Kabbalistic texts available to Christians up to that time Because the subject matter of this work appears so difficult and arcane it has never been appreciated as a significant text for understanding the emergence of modern thought However one can find in it the basis for the faith in science the belief in progress and the pluralism characteristic of later western

thought The Lurianic Kabbalah thus deserves a place it has never received in histories of western scientific and cultural developments Although van Helmont s efforts contributed to the development of religious toleration his experience as a prisoner of the Inquisition accused of Judaizing reveals the problematic relations between Christians and Jews during the early modern period New Inquisitional documents relating to van Helmont s imprisonment will be discussed to illustrate the difficulties faced by anyone advocating philo semitism and toleration at the time

The Alchemical Virgin Mary in the Religious and Political Context of the Renaissance Urszula Szulakowska, 2017-05-11 This study explores the survival of Roman Catholic doctrine and visual imagery in the alchemical treatises composed by members of the Lutheran and Anglican confessions during the Renaissance and Early Modern periods It discusses the reasons for such unexpected confessional survivals in a time of extreme Protestant iconoclasm and religious reform The book presents an analysis of the manner in which Catholic doctrines concerning the Virgin Mary the Holy Trinity and the Eucharist were an essential factor in the development of alchemical theory and illustration from the medieval period to the seventeenth century The role of the Joachimites radical members of the Franciscan Order in the history of alchemy is an important issue The Apocalypse of St John the Book of Revelation and other scriptural texts and specifically Roman Catholic Marian devotions are also considered regarding their influences on late medieval alchemy and on the sixteenth and seventeenth century alchemical literature composed by Protestants Additional issues explored here include the role played by alchemy in strengthening the leaders of the European defence against the invading Ottoman Turks as well as the importance of the figure of the Virgin Mary as the Apocalyptic Woman in the same cause Special consideration is given to the role played by the apocalyptic Mary within alchemical texts and pictures as an emblem of the mercurial quintessence and also in her form as the Bride of the scriptural Wisdom books which also entered alchemical discourse Additional issues discussed in this book include the little regarded problem of confessional alchemy namely whether there were distinct Protestant and Roman Catholic types of alchemy The treatises under consideration include the Buch der Heiligen Dreifaltigkeit 1419 1433 the Rosarium Philosophorum 1550 Reusner s Pandora 1582 1588 and the Pandora of Faustus 1706 as well as the work of Michael Maier Robert Fludd Johann Daniel Mylius Jacob Boehme and pseudo Nicolas Flamel among many others Their works are contextualised within the religious reforms instigated by Martin Luther as well as within the unorthodox radical theology devised by Paracelsus and his alchemical followers The Marian theology of Paracelsus is also of particular interest here
