

GUIDE TO THE IDENTIFICATION OF THE PRODUCTION OF ALFA ROMEO CARS

1910 - 1989

INTRODUCTION

The objective of this book is to bring together all the A.L.F.A., Alfa Romeo and Alfa Romeo cars sold in Italy, plus the most important models sold overseas, using pictures of the period which are, therefore, historically accurate; in a very few cases, photographs have been used of carefully selected cars which have been either preserved or restored.

Racing cars not available to the public but used by works drivers have been excluded, although mention has been made of them at the end of each annual section; they will be the subject of a subsequent publication. An Alfa Romeo story, which is presented in this way, recording the appearance of new models year by year and which indicates modifications made to cars already in production, may seem cold and schematic and, therefore, more distant than others which are more conventional.

But in this way, using a system of consultation which can be immediately understood, I wanted to provide answers to the more frequent questions posed by students of the brand, potential buyers of vintage Alfa Romeo cars and enthusiasts.

Thanks to the abundance of historical and technical data and with a series of comparative information and elements which can be easily verified, it is particularly easy to identify each Alfa Romeo and personally evaluate the conformity of the various components.

I considered it appropriate to bring this project to a close for the moment with the introduction of front-wheel drive, also on the traditional Alfa Romeo.
