examination latent fingerprints and rudimentary toxicology or how to determine the presence or absence of drugs and poisons Well organized and methodical this textbook has the potential to become the standard text for applying techniques of the physical and natural sciences to examining physical evidence Uses real cases recent and historic to illustrate concepts Colorful pedagogy clearly defines chapter elements and sets this text apart from next best Presents the basics of forensic sciences in a one semester or one year course Offers excellent preparation for professional examinations Delivers the latest in laboratory technique while acknowledging the limits of technology *Scientific Sleuthing Review* ,1997 *Turning the Investigation on the Science of Forensics* United States. Congress. Senate. Committee on Commerce, Science, and Transportation,2013 **Investigation and Forensic Science Technologies** Kathleen Higgins,1999 *The Forensic Science Service* Great Britain: Parliament: House of Commons: Science and Technology Committee,2011-07 The Science and Technology Committee is not confident that an orderly transition can be achieved by the extremely challenging deadline for closure of the Forensic Science Service of March 2012 Extending the deadline by at least six months would allow the government to consult on and determine a wider strategy for forensic science In making its decision to close the FSS the government failed to give enough consideration to the impact on forensic science research and development the capacity of private providers to absorb the FSS s 60% market share and the wider implications for the criminal justice system These considerations appear to have been hastily overlooked in favour of the financial bottom line The report also draws attention to the historical inadequacies in government decision making that brought the FSS to its current financial situation The FSS s dire financial position appears to have arisen from a complex combination of factors principally the shrinking forensics market driven by increasing police in sourcing of forensic science services and a forensic procurement framework that has driven down prices and does not adequately recognise the value of complex forensic services In the transition to closure transferring work from the FSS to a non accredited police or private laboratory would be highly undesirable posing significant and unacceptable risks to criminal justice Proposals should be brought forward immediately to provide the Forensic Science Regulator with statutory powers to enforce compliance with quality standards
