

Hess law lab

The objective of the present experiment is to determine ΔH_1 at constant T and P for the reaction:

To do this, the ΔH 's of two reactions will be measured along with a ΔH value taken from the literature. Specifically the reactions are:

If the temperature is 25.0 °C and the pressure is 1 atm,

$$\Delta H_4 = 2 \Delta H_f^\circ (\text{H}_2\text{O(l)}) = 2 (-285.6 \text{ kJ/mol}) = -571.6 \text{ kJ/mole}$$

where the enthalpy of formation of liquid water is defined as

Equations (2), (3), and (4) can be manipulated to obtain equation (1). Specifically,

$$\Delta H_1 = 2 \Delta H_2 - 2 \Delta H_3 + \Delta H_4 \quad (5)$$

The ΔH_1 obtained from (5) will be compared to the accepted value and a percent difference will be reported.

The experiment was performed as follows. For the Mg + HCl reaction, 50.0 mLs of 1M HCl solution was added to two nested Styrofoam cups. A thermometer was placed in a hole in a plastic lid which covered the Styrofoam cup, to minimize heat loss to the air. The starting temperature of the HCl solution was recorded. Approx. 0.12g of Mg was added to the HCl solution, the thermometer/lid was quickly replaced, and the temperature was monitored. The maximum temperature was recorded as the final temperature. The procedure for the MgO + HCl reaction was identical, except that approx. 0.50g of MgO was used instead of Mg.

Fill in the data for Table 2 below with the following data.

Line 1: 0.113

Lines 2 and 3: ignore

Method of Dimensionality Reduction in Contact Mechanics Valentin L. Popov,Markus Hess,Emanuel Willert,2018-08-08 The present book is a collection of open access papers describing the foundations and applications of the Method of Dimensionality Reduction MDR first published in the Journal Facta Universitatis Series Mechanical Engineering in the years 2014 2018 The Method of Dimensionality Reduction MDR is a method of calculation and simulation of contacts of elastic and viscoelastic bodies It consists essentially of two simple steps a substitution of the three dimensional continuum by a uniquely defined one dimensional linearly elastic or viscoelastic foundation Winkler foundation and b transformation of the three dimensional profile of the contacting bodies by means of the MDR transformation As soon as these two steps are done the contact problem can be considered to be solved For axial symmetric contacts only a small calculation by hand is required which does not exceed elementary calculus and will not be a barrier for any practically oriented engineer Alternatively the MDR can be implemented numerically which is almost trivial due to the independence of the foundation elements In spite of its simplicity all results are exact The present book brings together papers covering the most important aspects of the MDR and providing a practical guide for its use

Fundamentals of Nursing - E-Book Patricia A. Potter,Anne G. Perry,Patricia A. Stockert,Amy Hall,Wendy R.
