American Journal of Education ,1899 **Human Aging I** National Institute of Mental Health (U.S.),1976 Human Aging: a Biological and Behavioral Study National Institute of Mental Health (U.S.),James E. Birren,1963 Many of the more serious public health problems of our day relate to the later years of life and one of the most challenging issues for scholarly study is the mystery of the phenomenon of aging itself This volume presents the efforts of 22 investigators and is primarily directed toward the understanding of the aging experience and the processes it involves However consonant with the premise of science that pure inquiry affords practical consequences the public health implications of this work are obvious Two strategies are clear in this study first the selection of the healthy community dwelling aged so that we may look anew at the prevailing ideas and research findings concerning the aged and aging which heretofore have stemmed primarily from studies of the sick and institutionalized second the introduction of the collaborative multidisciplinary approach so that there can be a more complete and accurate evaluation of the many factors known or believed to determine the overt manifestations of aging As important as the substantive findings are the methods used in the research investigations Despite the public health significance of the problems affecting the aged ranging from sensory handicaps to housing to mental and physical illness there has been a relative neglect of the study care and treatment of the aged Basic inquiry into the final stages of life therefore is a welcome

contribution to our public health effort in this country It is opportune in many ways that this volume appears now at a time of increased national concern for the welfare of our older citizens and for the study and improvement of their health and welfare PsycINFO Database Record c 2005 APA all rights reserved **New England Journal of Education** ,1897 **El-Hi Textbooks and Serials in Print** ,2006 **Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ... Anderson,Sid F. Bourke,2013-05-13 The affective realm is a critical but often forgotten aspect of schooling The development of character and the formation of appropriate learning environments rely to a large extent on understanding the affective nature of students Even when the focus is on cognitive achievement affect has a role to play Teachers frequently mention a lack of motivation as a primary reason for students not achieving as well as they should or as well as their teachers would like Despite the importance of affect educators rarely make an effort to systematically collect and use information about students affective characteristics to better understand students and to substantially improve the quality of education they receive This book s purpose is to provide educators with the knowledge and skills they need to design and select instruments that can be used to gather information about students affective characteristics Once valid and reliable information has been gathered it can be used to aid in understanding and to improve educational quality The second edition features an updated list of affective characteristics i e attitudes values interests self esteem self efficacy locus of control a dual emphasis on selecting and designing affective assessment instruments an emphasis on multi scale instruments i e a single instrument with multiple affective scales the use of a single small data set to illustrate and foster understanding of key concepts and procedures a dual emphasis on data about individual students and groups of students a dual focus on the instrumental value of affective data and the inherent value of affective data i e affect is valuable in and of itself Report ,1930
