

Project Lead the Way (PLTW)

The PLTW middle and high school STEM education programs provide the inspiration for a new generation of innovators, the practical skills and hands-on experience to make students' knowledge count in the real world, and the basis for the next generation of leadership in the sciences, technology, engineering, and mathematics.

PLTW develops motivated, well-rounded students by instilling confidence, stressing the importance of self-discovery, encouraging innovative problem solving and critical thinking, teaching team building, and rewarding creativity.

Your student will develop skills essential for achievement in the classroom and success in college and at work. Additionally:

- PLTW students achieve significantly higher scores in reading, mathematics, and science.
- PLTW graduates earn higher GPA's as college freshmen.
- PLTW graduates are 5 to 10 times more likely to study STEM related fields.

Project Lead the Way is a non-profit organization focused on introducing and preparing high school students for Biomedical, engineering and technical careers of the future. PLTW forms partnerships with public schools, higher education institutions and the private sector to increase opportunities for students in engineering and technical fields. Particularly, PLTW provides a high rigor, project-based curriculum meeting national science and math standards, professional development for teachers and guidance counselors and a comprehensive national support network. PLTW courses are accessible to ALL students, and the initial biomedical courses expose students to multiple career options in the biomedical arena. All of the courses are based on problem-solving, teamwork, communication and leadership as the students also build the math, science and technology skills to prepare for and succeed in tomorrow's careers.

Students are eligible for college credit for all four PLTW Biomedical Sciences courses and IED, POE, and DE in the PLTW Engineering program. (For Biomedical Sciences courses, please see Science Curriculum portion of this handbook).

Schilizzi, Ronald D. Ekers, Peter E. Dewdney, Philip Crosby, 2024-06-21 The Square Kilometre Array SKA is a grand vision project to build the most sensitive radio telescope in the world This open access book tells the story of its development a story of transformational science innovative engineering and global collaboration Its journey has been long and complex reflecting the many issues faced in creating an affordable design choosing a site and developing a viable global organisation starting from a simple working group of far sighted and

persistent astronomers in 1993 The book begins with the emergence of the SKA concept and the first working group It traces the development of global scientific and engineering collaborations and ever more comprehensive governance structures for the SKA the involvement and roles of funding agencies and governments and the long political site selection process This occurred alongside efforts to overcome technical barriers and the difficult process of selecting technology It follows these themes up to the point in 2012 when the project had just transitioned from a collaboration to a legal entity and the dual site decision was made a pivotal moment when it was clear the SKA arrays would be built The book is based on the authors personal experience at the leading edge of the project over many years as well as access to hitherto unpublished material from project archives interviews and presentations from many of the key players at a specially convened conference It has a Foreword written by John Womersley former Chair of the Agencies SKA Group and SKA Organisation Board The book is intended for an audience ranging from funding agencies and governments involved in major research infrastructures to historians of science and professional researchers studying mega projects to the astronomy and physics communities in general and interested lay readers
