The Great Formal Machinery Works Jan von Plato, 2017-08-02 The information age owes its existence to a little known but crucial development the theoretical study of logic and the foundations of mathematics The Great Formal Machinery Works draws on original sources and rare archival materials to trace the history of the theories of deduction and computation that laid the logical foundations for the digital revolution Jan von Plato examines the contributions of figures such as Aristotle the nineteenth century German polymath Hermann Grassmann George Boole whose Boolean logic would

prove essential to programming languages and computing Ernst Schröder best known for his work on algebraic logic and Giuseppe Peano cofounder of mathematical logic Von Plato shows how the idea of a formal proof in mathematics emerged gradually in the second half of the nineteenth century hand in hand with the notion of a formal process of computation A turning point was reached by 1930 when Kurt Gödel conceived his celebrated incompleteness theorems They were an enormous boost to the study of formal languages and computability which were brought to perfection by the end of the 1930s with precise theories of formal languages and formal deduction and parallel theories of algorithmic computability Von Plato describes how the first theoretical ideas of a computer soon emerged in the work of Alan Turing in 1936 and John von Neumann some years later Shedding new light on this crucial chapter in the history of science *The Great Formal Machinery* Works is essential reading for students and researchers in logic mathematics and computer science **Advanced Theory of the Logical Design of Digital Computers** ,1959 *Summaries of Talks Presented at the Summer Institute for Symbolic Logic* ,1960 *Applied Mechanics Reviews* ,1975 Math Educ ,2007 Contains abstracts in the field of mathematics education extracted from documents worldwide **The Arithmetic Teacher** ,1986 **Algebra, First [-second] Course** Howard Franklin Fehr,1962 **Research Paper** ,1989 **ICASSP 90: Digital signal processing** ,1990 *Indian Science Abstracts* ,2008-11 **Computer Mathematics** ,1979 *The Journal of Symbolic Logic* ,2003 *SIAM Journal on Scientific and Statistical Computing* Society for Industrial and Applied Mathematics,1988 **Soviet Mathematics** ,1969 **PC Magazine** ,1989
