describing exercises on the case study level and there are also studies introducing new methodologies for transdisciplinary remote sensing applications Even though most of the authors look forward to continuing their research nearly all studies introduced are ready for operational use or have already been implemented in practical forestry Resources in Education,1999-04 Nature-based Tourism and Wellbeing Federico Niccolini,James R. a classic social dilemma which pits individual parents and children against a greater social good This book examines parent physician conversations in detail showing how parents put pressure on doctors in largely covert ways for instance in specific communication practices for explaining why they have brought their child to the doctor or answering a history taking question This book also shows how physicians yield to this seemingly subtle pressure evidencing that apparently small differences in wording have important consequences for diagnosis and treatment recommendations Following parents use of these interactional practices physicians are more likely to make concessions alter their diagnosis or alter their treatment recommendation This book also shows how small changes in the way physicians present their findings and recommendations can decrease parent pressure for antibiotics This book carefully documents the important and observable link between micro social interaction and macro public health domains
