Anatomy And Physiology Class Description:

The Not-So-Intelligent Designer Abby Hafer, 2016-09-29 Why do men's testicles hang outside the body? Why does our appendix sometimes explode and kill us? And who does the Designer like better anyway, us or squid? These and other questions are addressed in *The Not So Intelligent Designer*. Dr. Abby Hafer argues that the human body has many faulty design features that would never have been the choice of an intelligent creator. She also points out other animals that got better body parts which makes the Designer look a bit strange, discusses the history and politics of Intelligent Design, and creationism, reveals animals that shouldn't exist according to Intelligent Design, and disposes of the idea of irreducible complexity. Her points are illustrated with pictures by Alexander Winkler with wit and erudition. *The Hidden Curriculum—Faculty-Made Tests in Science*

Sheila Tobias, Jacqueline Raphael, 2013-06-29 This resource manual for college level science instructors reevaluates the role of testing in their curricula and describes innovative techniques pioneered by other teachers. Part I examines the effects of the following on lower division courses: changes in exam content format and environment, revisions in grading practices, student response, colleague reaction, the sharing of new practices with other interested professionals, and more. The book includes a comprehensive introduction, faculty composed narratives, commentaries by well known science educators, and a visual index to 100 more refined innovations. **OE [publication]**, 1966 *Veterinary Anesthesia and Analgesia* Kurt A.
