[Drawing Blood](#) Keith Wailoo,2002-10-15 How physicians in this century wielded medical technology to define disease carve out medical specialties and shape political agendas Winner of the American Public Health Association Arthur Viseltear Prize In Drawing Blood medical historian Keith Wailoo uses the story of blood diseases to explain how physicians in this century wielded medical technology to define disease carve out medical specialties and shape political agendas As Wailoo s account makes clear the seemingly straightforward process of identifying disease is invariably influenced by personal professional and social factors and as a result produces not only clarity and precision but also bias and outright error Drawing Blood reveals the ways in which physicians and patients as well as the diseases themselves are simultaneously shaping and being shaped by technology medical professionalization and society at large This thought provoking cultural history of disease medicine and technology offers an important perspective for current discussions of HIV and AIDS genetic blood testing prostate specific antigen and other important issues in an age of

technological medicine Makes clear that the high stakes involved in medical technology are not just financial but moral and far reaching They have been harnessed to describe clinical phenomena and to reflect social and cultural realities that influence not only medical treatment but self identity power and authority Susan E Lederer H Net Humanities Social Sciences On Line Wailoo s masterful study of hematology and its disease discourse is a model of interdisciplinarity combining cultural analysis social history and the history of medical ideas and technology to produce a complex narrative of disease definition diagnosis and treatment He reminds us that medical technology is a neutral artifact of history It can be and has been used to clarify and to cloud the understanding of disease and it has the potential both to constrain and to emancipate its subjects Regina Morantz Sanchez Journal of Interdisciplinary History *Environmental Health Perspectives* ,2003

Hamilton,2014-03-24 There is something sad about a person who blindly sacrifices his life for his country for he is unaware of the real issues If a person can grasp the truth about war it can't help but color his thinking on such issues as draft dodging The name draft dodger suggests the evasion of a just debt or obligation In reality a draft dodger is either a person who rejects military service on religious or moral grounds or plainly doesn't want to allow himself to be killed Any of those reasons should be good enough and I don't think that he should be persecuted or prosecuted A person who is willing to sacrifice his life for his country is merely a dupe in the profit game of the military industrial complex A man who has the courage to stand up against such twisted idealism and refuse to be sacrificed for profiteers is no coward My opinion of the draft dodger differs from the opinion of many of my peers but then my generation is probably one of the biggest collections of fools on record Major Ralph E Hamilton WW2 Veteran 1976
