Issue of Animal Cruelty

Animals don't have a voice and humans are their only chance at speaking up about the abuse and getting justice for what is right. But when it comes to cases of animal cruelty, the court does not protect and treat all animals the same as they do human beings.

Animal cruelty, also known as animal abuse, is legally defined as any act of violence or neglect that inflicts suffering or death on animals. Animal cruelty laws typically extend only to tame or domestic animals, such as house pets, horses, and draught or other working animals. Lawful hunting or trapping of wild game, research—such as animal testing—and breeding or raising livestock can also be subjected to animal cruelty laws if unnecessary pain is being inflicted upon an animal (Gale 2017). Animal cruelty can fall under two types of categories: passive and active (intentional). Intentional abuse will be charged according to their state's criminal law that may result in either jail time or paying fines.

Passive abuse is a gray area when it comes to every state's criminal law because it means the owner neglected their animal and didn't properly care for the animal in the way they should've. Neglect is a lesser included offense of cruelty involving the duties of caring for an animal (Welch 2009). There are several forms of active animal cruelty such as animal fighting and experimentation. Activists are attempting to raise awareness about animal abuse by creating interest groups such as PETA and SPCA. Those interest groups strive to get laws that can keep animals safe passed such as one of the first anti-cruelty law passed in New York.

The Gale Student Resources in Context article titled Animal Cruelty quotes, "Views and laws on animal cruelty or abuse vary greatly across different cultures. In many parts of the world, domestic animals are regarded primarily as property, and anti-cruelty laws may be nonexistent or limited to preventing only unnecessary acts of cruelty and abuse. At the opposite end, many people believe animals should be afforded the same moral rights and given the same legal protections as humans (Gale 2017)."

A form of animal cruelty that is legal with a license is experimentation. Scientists and corporations test on animals such as rats, mice, birds, and fish. People who support animal cruelty will go on to state that it is for the good of this world because they test this form of animal abuse for medical purposes. Before 1996, there was no regulation of animal experimentation, and they would go on to experiment on other animals, especially primates due to their similarities to humans. In response to companies using dogs as test subjects in labs, the public raised a fuss and got the Animal Welfare Act of 1966 passed by the US government. In the 1966 Animal Welfare Act, it is stated that animal testing companies must obtain a license and be registered to deal with animals.
