Anne McGill Franzen Kindergarten Curricula:

Shaping the Preschool Agenda Anne McGill-Franzen, 1993-01-01 Making all children ready to learn is the first and probably the most important national education goal for the year 2000 What does it mean for children to be ready to learn This book is about the beliefs of the people who are shaping preschool policy McGill Franzen tells us what key decision makers are thinking about preschool education what counts as school who should pay for it what should be taught and especially whether there should be reading and writing programs for four year olds This book also explores the history of these beliefs The author locates contemporary early childhood concepts about developmental appropriateness in the ideas of physicians and psychologists of the 1920s 1930s and in even earlier periods of time She believes that these ideas no longer work within the broader framework of literacy as embedded in the interactions of cultures children know and the lives they live

The Promise of Preschool Elizabeth Rose, 2010-03-17 The past 45 years have seen the emergence of education for young children as a national issue spurred by the initiation of the Head Start program in the 1960s efforts to create a child care system in the 1970s and the campaign to reform K 12 schooling in the 1980s Today the push to make preschool the beginning of public education for all children has gained support in many parts of the country and promises to put early education policy on the national agenda Yet questions still remain about the best ways to shape policy that will fulfill the promise of preschool In *The Promise of Preschool* Elizabeth Rose traces the history of decisions on early education made by presidents from Lyndon Johnson to George W Bush by other lawmakers and by experts advocates activists and others Using this historical context as a lens the book shows how the past shapes today's preschool debate and provides meaningful perspective on the policy questions that need to be addressed as we move forward Should we provide preschool to all children or just to the neediest Should it be run by public schools or incorporate private child care providers How do we most effectively ensure educational quality and success *The Promise of Preschool* is a balanced in depth investigation into these and other important questions and demonstrates how an understanding of the past can stimulate valuable debate about the care and education of young children today

Applebee,2008-05-28 Applebee s central point the need to teach knowledge in context is absolutely crucial for the hopes of any reformed curriculum His experience and knowledge give his voice an authority that makes many of the current proposals on both the left and right seem shallow by comparison Gerald Graff University of Chicago
