App Users in Berlin explores how dating apps fit into Berlin s unique dating culture and brand of intimacy and form a

tangible nucleus around which users navigate dating rituals romantic biographies and digitally mediated intimacies within

city space Drawing on the field of digital anthropology this book takes the form of an immersive ethnography resulting from

13 months of fieldwork with young dating app users across Tinder Bumble and OkCupid in Berlin It argues that dating apps offer or impose depending on their context of use a series of affordances These affordances and the technological devices they rely upon exist through the relation between users and their environment both in terms of physical spaces and cultural frameworks The book posits that dating apps are woven into spatial practices and self narrativisation constituting imagined communities for their users as well as a canvas alongside the city of Berlin against which to characterise romantic experiences Scholars interested in digital anthropology ethnography dating and regional Berlin will find that Love and Technology offers a vibrant springboard for thinking through both theoretical and methodological concerns **The Social**

Zacher, 2017-03-02 This collection is a multidisciplinary and multicultural contribution to the current sustainability discourse. It is focused on two main dimensions of our world complexity and diversity. Desirable and urgent transition of socio technological systems toward a sustainability trajectory of development requires a better understanding of technological trends and social transformations. General advancement of technology does not produce identical changes in various societies differentiated economically and culturally. Moreover the abilities to approach sustainable development change over time and space. As a result there is a constant need for continuing research analyses and discussions concerning changing contexts and adequacy of strategies and policies. Authors from twelve countries and of different academic and cultural settings present their insights analyses and recommendations. The collection is focused both on contexts and on activities leading to sustainable trajectories in various domains of economy and social life. Continuing research and discussion is needed to better understand these challenges and to prepare the appropriate strategies and solutions. Development of socio technological systems is nowadays very complex moreover the world we live in is extremely diverse. Therefore sustainability discourse must be ongoing introducing new ideas concepts theories evidence and experience by various parties academics professionals and practitioners. In doing so it also discusses a range of attempts undertaken to bridge the education divide. Subsequently the book has attempted in providing a socio technical framework towards optimally deploying social technologies for addressing the issue of education divide of marginalized communities. The proposed framework offers a transition from traditional content centric teacher centric and centralized education ecosystem to a connection centric learner centric and decentralized education ecosystem of the socio digital age. It demonstrates how Internet enabled digital platforms based on the principles of sharism and mass collaboration using social technologies could help to solve one of the greatest problems facing the world mitigating the extant education divide by delivering quality education to underprivileged sections of society. The book also presents empirical validation of the proposed framework to show how a community driven

blended learning platform can mobilize the dormant knowledge capital of domain experts to teach underprivileged rural Indian children as well as help form communities of practice to enable lifelong learning for the rural adult population The book closes by pointing out the challenges involved in building an equitable education ecosystem using social technologies and ultimately the possibility of creating a fair and equitable society Given its scope the book offers a valuable resource for researchers policymakers and practitioners in the domain of education who want to transform education ecosystems by using technological and process related innovations to improve educational practices for underprivileged sections of society
