Engage Educate Vinesh Chandra, 2019-12-09 There is no doubt that our world is becoming increasingly more connected through digital technologies For meaningful participation in this environment we need to be digitally literate yet there are many children in developing countries who have yet to touch a computer because of social disadvantage For these children schools are the only place where they can build this capacity Regrettably many schools in these communities are under resourced They do not have sufficient and relevant library books let alone digital resources As a consequence teaching and learning strategies have remained unchanged for decades The field of critical pedagogy evolved through the initial work of Paulo Freire This theory is underpinned by critical thinking about societal issues followed by action and reflection When citizens are armed with such knowledge and skills they can positively impact on the lives of the underprivileged Critical pedagogy however is still struggling to find its meaningful place particularly in higher education This is largely due to the lack of effective strategies and critical educators *Share Engage Educate* is an auto ethnography which presents accounts of

the initiatives that were undertaken to promote print and digital literacy in rural and remote schools in eight developing countries It highlights the experiences of school leaders teachers university staff and students and globally minded citizens working alongside local communities to enhance the quality of education for over 15 000 children in these schools This book explores how critical pedagogy can unfold in educational spaces through knowledge sharing engaging and in the process educating all stakeholders
