Animal Alterity Sherryl Vint, 2010-01-01 *Animal Alterity* uses readings of science fiction texts to explore how animals are central to our perception of humanity. Arguing that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns, Sherryl Vint expresses an urgent need to reconsider the human-animal boundary in a world of genetic engineering, factory farming, species extinctions, and increasing evidence of animal intelligence, emotions, and tool use. Mapping the complex terrain of human relations with non-human animals, this book offers an important intervention into the contentious ongoing discussions of the post-human.

Animal Alterity Sherryl Vint, 2010-04-21 *Animal Alterity* uses readings of science fiction texts to explore the centrality of animals for our ways of thinking about human. It argues that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns: thinking about otherness and the nature of human being, desiring communication across species difference, and interrogating the social and ethical consequences of changes in science and technology. We are living in a complex set of contradictory and conflicting relations with non-human animals. This book maps this complex terrain, arguing that we are better able to perceive options for a transformed politics if we perceive our various material relations with non-human animals within a deeper understanding of the functions of the category animal.

Animals and Science Fiction Nora Castle, Giulia Champion, 2024-03-22 *Animals and Science Fiction* is the first edited collection to be published focusing on the intersection of animal studies and science fiction studies. It offers a broad range of theoretical approaches and primary source texts including novels, short stories, poetry, film, and TV, photography, erotica, video games, and urban planning documents that explore the ways works of science fiction can transform how we see and interact with nonhuman others. With an eye toward more just multispecies futures, it argues that speculative imaginaries can be pivotal in changing attitudes toward and understandings of nonhuman animals in our world today. Chapters appeal to those interested in biopolitics, posthumanism, new materialism, ecocriticism, and the environmental humanities, ocean humanities, postcolonial studies, critical race studies, Indigenous studies, global SF studies, film studies, and food studies. Taken together, the collection works to showcase a diverse and growing field of scholarly inquiry into animals and science fiction.
