Kirchner,James Sperling,2010-07-12 This edited volume examines changes of national security culture and the implications that this has for international security Strategic Cultures in Europe Heiko Biehl,Bastian Giegerich,Alexandra Jonas,2013-04-09 European countries work together in crisis management conflict prevention and many other aspects of security and defence policy Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges Yet despite the repeated interaction fundamental assumptions about security and defence remain remarkably distinct across European nations This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots **EU Industrial Policy in the Multipolar Economy** Defraigne, Jean-Christophe,Wouters, Jan,Traversa, Edoardo,Zurstrassen, Dimitri,2022-10-14 This incisive book provides key interdisciplinary perspectives on the current challenges faced by EU policymakers in framing and implementing a coherent European industrial policy employing specific case studies from the digital automotive steel and defence industries as well as concrete examples of EU policies Economic Patriotism in Open Economies Ben Clift,Cornelia Woll,2013-09-13 The recent financial crisis has demonstrated that governments continuously seek to steer their economies rather than leaving them to free markets Despite the ambitions of international economic cooperation such interventionism is decidedly local Some politicians even proudly evoke economic patriotism to justify their choices This volume links such populism to a specific set of tensions the paradox of neo liberal democracy and argues that the phenomenon is ubiquitous The mandate of politicians is to defend the economic interests of their constituents under conditions where large parts of economic governance are no longer exclusively within their control Economic patriotism is

one possible reaction to this tension As old style industrial policy and interventionism gained a bad reputation governments had to become creative to assure traditional economic policy objectives with new means However economic patriotism is more than just a fashionable word or a fig leaf for protectionism This volume employs the term to signal two distinctions the diversity of policy content and the multiplicity of territorial units it can refer to Comparing economic interventionism across countries and sectors it becomes clear that economic liberalism will always be accompanied by counter movements that appeal to territorial images This book was published as a special issue of the Journal of European Public Policy **1997 :**
