MARK SCHEME for the May/June 2014 series

0610 BIOLOGY

0610/61

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Energy as a Curse The analysis of rentierism in Post soviet states which this book presents underscores the need for further research as rentier state concepts have mainly been applied to older rentier states like African Latin American and Arab countries An important contribution to a topical discussion During the last 30 years many resource rich countries have experienced economic and political stagnation resource curse They have developed deficient political systems in which the process of modern state formation is being undercut rentier state as well as economic structures in which sectors that provide strong incentives for the accumulation of physical and human capital are under represented Dutch disease This is very much the same in many of the post Soviet states with high resource incomes since the mid 1990s These incomes present opportunities for reducing poverty and promoting economic growth But instead of taking advantage of these opportunities many of them present authoritarian regimes with high levels of corruption low political freedom and rent seeking elites The book gives a detailed analysis of rentierism in Post soviet states
