06 November 2014 Zimsec Paper 2:

Masculinities under Neoliberalism Andrea Cornwall, Frank G. Kariotis, Nancy Lindisfarne, 2016-05-15 Neoliberalism has had a radical impact on the lived gendered experiences of people around the world But while the gendered dimensions of neoliberalism have already received significant scholarly attention the existing literature has given little consideration to men s identities and experiences Building on the work of Cornwall and Lindisfarne s landmark text *Dislocating Masculinity* this collection provides a fresh perspective on gender dynamics under neoliberalism Bringing together a series of short readable case studies drawn from new ethnographic fieldwork its subjects range from the experiences of working class men in Putin s Russia to colonial masculinities in Southern Rhodesia and from young British Muslim men to amateur footballers in Jamaica

Gender, Asset Accumulation and Just Cities Caroline O.N. Moser, 2015-10-05 With more than half the world s population now living in urban areas urbanisation is undoubtedly one of the most important phenomena of the 21st century However despite increasing recognition of the critical relationship between economic and social development in cities gender issues are often overlooked in understanding the complexities of current urbanisation processes This book seeks to rectify this neglect *Gender Asset Accumulation and Just Cities* explores the contribution that a focus on the gendered nature of asset accumulation brings to the goal of achieving just more equitable cities To date neither the academic debates nor the formulated policy and practice on just cities has included a focus on gender based inequalities discriminations or opportunities From a gender perspective a separate discourse exists closely associated with gender justice particularly in relation to urban rights and democracy Neither however has addressed the implications for women s accumulation of assets and associated empowerment for transformational pathways to just cities In this book contributors specifically focus on gender and just cities from a wide range of gendered perspectives that include households housing land gender based violence transport climate and disasters *Grid-locked African Economic Sovereignty* Warikandwa, Tapiwa

Victor, Nhemachena, Artwell, 2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo

imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions **Robert Mugabe** Sue Onslow,Martin Plaut,2018-03-05

Zimbabwe's President Robert Mugabe sharply divides opinion and embodies the contradictions of his country's history and political culture As a symbol of African liberation and a stalwart opponent of white rule he was respected and revered by many This heroic status contrasted sharply in the eyes of his rivals and victims with repeated cycles of gross human rights violations Mugabe presided over the destruction of a vibrant society capital flight and mass emigration precipitated by the policies of his government resulting in his demonic image in Western media This timely biography addresses the coup led by some of Mugabe's closest associates that forced his resignation after thirty seven years in power Sue Onslow and Martin Plaut explain Mugabe's formative experiences as a child and young man his role as an admired Afro nationalist leader in the struggle against white settler rule and his evolution into a political manipulator and survivalist They also address the emergence of political opposition to his leadership and the uneasy period of coalition government Ultimately they reveal the complexity of the man who stamped his personality on Zimbabwe's first four decades of independence Contemporary

Chinese Diasporas Min Zhou,2017-09-15 This book focuses on International migration among the Chinese long before European colonists set foot on the Asian continent Long before European colonists set foot on the Asian continent the Chinese moved across sea and land seasonally or permanently to other parts of Asia and the rest of the world to pursue economic opportunities and alternative means of livelihood This volume addresses the new Chinese diasporas around the world offering a snapshot of the cosmopolitan and shifting nature of Chinese population dynamics from the perspectives of anthropologists sociologists and scholars of international studies *Urban Informality in South Africa and Zimbabwe*

Inocent Moyo,Trynos Gumbo,2021-01-09 This book adds to the research of urban informality in the Global South with a specific focus on South Africa and Zimbabwe It addresses the agency and the potential transformative capacity of the phenomenon of urban informality in connection with Southern African cities and towns It adopts a political economy approach to analyse the evolution of informality in cities and its implications for urban planning It brings to bear how the South African and Zimbabwean historical and or ideological and contemporary political and economic trajectories have impacted on the ever changing nature of urban informality both spatially and structurally and or compositionally thus resulting in unique urban materialities which are aspects that have scarcely been studied or discussed in the extant literature This book therefore seeks to close the academic gap by dealing with the dearth of literature on spatial re locational discourses of urban informality The work positions urban informality as a resilient force with potency in terms of political mobilisation and re shaping urban spaces Though these are fundamental issues they have received comparatively little attention especially in literature that focuses on the Southern African region Accordingly undergraduate and post graduate students as well as academics in the fields of Urban Geography Political Science Development Studies Sociology Town and

Regional Planning among others will find the range of topics and depth of coverage in this book particularly valuable Similarly practitioners and activists on issues of urban informality and urban governance will find the book very useful

Globalization and Labour in the Twenty-First Century Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital However workers around the world are challenging their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work

The Delusion of Knowledge Transfer Susanne Koch, Peter Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens

War by Other Means Robert D. Blackwill, Jennifer M. Harris, 2016-04-11 A Foreign Affairs Best Book of 2016 Today nations increasingly carry out geopolitical combat through

economic means Policies governing everything from trade and investment to energy and exchange rates are wielded as tools to win diplomatic allies punish adversaries and coerce those in between Not so in the United States however America still too often reaches for the gun over the purse to advance its interests abroad The result is a playing field sharply tilting against the United States Geoeconomics the use of economic instruments to advance foreign policy goals has long been a staple of great power politics In this impressive policy manifesto Blackwill and Harris argue that in recent decades the United States has tended to neglect this form of statecraft while China Russia and other illiberal states have increasingly employed it to Washington s disadvantage G John Ikenberry Foreign Affairs A readable and lucid primer The book defines the extensive topic and opens readers eyes to its prevalence throughout history Presidential candidates who care more about protecting American interests would be wise to heed the advice of War by Other Means and take our geoeconomic toolkit more seriously Jordan Schneider Weekly Standard **Infrastructures for Peace in Sub-Saharan Africa** Mediel Hove, Geoff

Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it Development in Difficult Sociopolitical Contexts A. Ware, 2016-04-30 This edited volume explores

development in the so called fragile failed and pariah states It examines the literature on both fragile states and their development and offers eleven case studies on countries ranking in the very high alert and very high warning categories in the Fund for Peace Failed States Index **Healing the Wounds of Gukurahundi in Zimbabwe** Dumisani Ngwenya, 2017-12-14 This book is based on a participatory action research project carried out with a group of former Zimbabwe People s revolutionary Army ZPRA which was the armed wing of the Zimbabwe African People s Union ZAPU which was led by the late Joshua Nkomo ZPRA was the primary target of Gukurahundi a pogrom by the Mugabe government which left an estimated 20 000 civilians dead and countless others tortured in the early 1980s in Matebeleland Zimbabwe It

has been almost 30 years since the violence ended but there has never been an official healing and reconciliation programme or truth commission into the atrocities The government chose the path of amnesia by granting a blanket amnesty to all involved The regime has enforced a culture of silence over the event through repression and intimidation The book is a culmination of a two year journey by the group and the author of an exploration of group based self healing approaches to the pain caused by the violence of Gukurahundi China's Power in Africa Olayiwola Abegunrin, Charity

Manyeruke, 2019-10-11 This book examines China's political economic and diplomatic engagement in Africa The rapid increase of China's economic and political involvement in Africa is the most momentous development on the continent of Africa since the beginning of the twenty first century China is now Africa's largest trading partner and the largest infrastructure financier Additionally it is the fastest growing economy and source of foreign direct investment This monograph seeks to understand the dynamics of the escalating Chinese investments in African economies and the political implications of this development for Africa This work will interest scholars students academics and policy makers on the fields of Chinese and African politics development studies and international political economy *Why States Recover* Greg Mills, 2015-01-03 State failure takes many forms Somalia offers one extreme The country's prolonged civil war led to the collapse of central authority with state control devolving to warlord led factions that competed for the spoils of local commerce political power and international aid Malawi on the other hand is at the other end of the scale During President Bingu's second term in office the country's economy collapsed as a result of poor policies and Bingu's brand of personal politics On the surface Malawi's economy seemed largely stable underneath however the polity was fractured and the economy broken In between these two extremes of state failure are all manner of examples many of which Mills explores in the fascinating and profoundly personal *Why States Recover* Throughout he returns to his key questions how do countries recover What roles should both insiders and outsiders play to aid that process Drawing on research in more than thirty countries and incorporating interviews with a dozen leaders Mills examines state failure and identifies instances of recovery in Latin America Asia and Africa For anyone interested in the reasons behind states failure and remedies to ensure future economic stability it is important reading *Opportunities and Pitfalls of Corporate Social Responsibility* Shame

Munyaradzi, Mubaya, Tapuwa R., 2015-12-12 This book serves as a drive and medium for constructive analysis critical thinking and informed change in the broad area of cultural heritage studies In Africa how to overturn the gory effects and reverse the wholesale obnoxious and unpardonable losses suffered from the excruciating experience of colonialism in a manner that empowers the present and future generations remains a burning question Colonial and liberation war heritage have received insignificant attention The relevance nature and politics at play when it comes to the role of memory and colonial heritage in view of nation building and sustainability on the continent is yet to receive careful practical and theoretical attention and scrutiny from both heritage scholars and governments Yet colonial heritage has vast potentials that if harnessed could reverse the gargantuan losses of colonialism and promote sustainable development in Africa The book critically reflects on the opportunities constraints and challenges of colonial heritage across Africa It draws empirical evidence from its focus on Zimbabwe South Africa Nigeria Ghana Zambia and Mozambique to advance the thesis that cultural heritage in Africa and in particular colonial heritage faces challenges of epic proportions that require urgent attention

Towards Employment-Intensive Growth in South Africa Anthony Black, 2016-07-01 South Africa's high rate of unemployment 26.4% makes it a complete outlier compared with other middle income countries Indeed the unemployment rate rises to 36% if discouraged workers are taken into account It underpins extreme poverty and inequality and is a major contributor to social dislocation If it were not for increased social payments poverty would have continued to increase since the advent of democracy in 1994 Unemployment also represents a huge cost to growth This book focuses on the growth path of the economy The starting point is that while more rapid economic expansion is an important objective at any given level of growth the economy as a whole needs to become more labour absorbing The central question posed is how to bring about changes in the economic structure and pattern of development which would lead to the attainment of this objective The authors argue that employment needs to be much more centrally positioned within the economic and social policy arena They emphasise innovative approaches within a broader focus on the growth path and employment intensive growth And they posit that the negative impact of previous distortions requires much more than a levelling of the playing field via market based reforms Apart from presenting an alternative growth path which could start to shift the economy in new directions the book tackles themes which have received only limited attention such as wage subsidies youth unemployment and employment growth in rural areas
