On the left, a female character with long brown hair, wearing a green tank top and black pants, is shown from the waist up, holding a large, ornate golden key. She has a determined expression. The temple architecture is made of dark brown stone blocks, with some parts appearing to be crumbling or overgrown. In the background, there are more temple structures and a small figure of another person. Middle-Income Trap Zhijie Zheng, 2020-09-21 This book explores the essence of the middle income trap based on two major perspectives namely economic transformation and social transformation. China has experienced high speed economic growth for nearly 40 years since the adoption of the Reform and Opening policies. However, China's economic growth has been slowing down significantly in recent years. Has China tumbled into the middle income trap? This book reveals the essence of the middle income trap: that a country's economic growth is facing a double squeeze in the middle income stage while the social structure and system are unsuitable for the new social development stage, which leads to economic stagnation or recession and the aggravation of social contradictions, that is the double predicament of economic transformation and social transformation. This judgment is of great value for understanding the problems encountered in the current development of China.
