KdV '95 Michiel Hazewinkel, Hans W. Capel, Eduard M. de Jager, 2012-12-06 Exactly one hundred years ago in 1895 G de Vries under the supervision of D J Korteweg defended his thesis on what is now known as the Korteweg de Vries Equation They published a joint paper in 1895 in the Philosophical Magazine entitled On the change of form of long waves advancing in a rectangular canal and on a new type of long stationary wave and for the next 60 years or so no other relevant work seemed to have been done In the 1960s however research on this and related equations exploded There are now some 3100 papers in mathematics and physics that contain a mention of the phrase Korteweg de Vries equation in their title or abstract and there are thousands more in other areas such as biology chemistry electronics geology oceanology meteorology etc And of course the KdV equation is only one of what are now called Liouville completely integrable systems The KdV and its relatives continually turn up in situations when one wishes to incorporate nonlinear and dispersive effects into wave type phenomena This centenary provides a unique occasion to survey as many different aspects of the KdV and related equations The KdV equation has depth subtlety and a breadth of applications that make it a rarity deserving special attention and exposition

Lectures on the Geometry of Numbers Carl Ludwig Siegel, 2013-03-09 Carl Ludwig Siegel gave a course of lectures on the Geometry of Numbers at New York University during the academic year 1945 46 when there were hardly any books on the subject other than Minkowski's original one This volume stems from Siegel's requirements of accuracy in detail both in the text and in the illustrations but involving no changes in the structure and style of the lectures as originally delivered This book is an enticing introduction to Minkowski's great work It also reveals the workings of a remarkable mind such as Siegel's with its precision and power and aesthetic charm It is of interest to the aspiring as well as the established mathematician with its unique blend of arithmetic algebra geometry and analysis and its easy readability *The Pearson Guide to Complete Mathematics for AIEEE* Khattar Dinesh, 2007-02 The second edition of The Pearson Guide to Complete Mathematics for AIEEE retains the basic structure and coverage of the previous edition while adding to it solved question papers of AIEEE 2005 and 2006 Spread over thirty two systematic and well written chapters this book covers the AIEEE syllabus completely and will also prove a useful guide for students appearing for state level engineering tests PETs

Geometry III Yu.D. Burago, V.A. Zalgaller, 2013-03-14 The original version of this article was written more than five years ago with S Z Shefel a profound and original mathematician who died in 1984 Since then the geometry of surfaces has continued to be enriched with ideas and results This has required changes and additions but has not influenced the character of the article the design of which originated with Shefel Without knowing to what extent Shefel would have approved the changes I should nevertheless like to dedicate this article to his memory Yu D Burago We are trying to state the qualitative questions of the theory of surfaces in Euclidean spaces in the form in which they appear to the authors at present This description does not entirely correspond to the historical development of the subject The theory of surfaces was developed in

the first place mainly as the 3 theory of surfaces in three dimensional Euclidean space E however it makes sense to begin by considering surfaces F in Euclidean spaces of any dimension $n \geq 3$ This approach enables us in particular to put in a new light some 3 unsolved problems of this developed and in the case of surfaces in E fairly complete theory and in many cases to refer to the connections with the present stage of development of the theory of multidimensional submanifolds The leading question of the article is the problem of the connection between classes of metrics and classes of surfaces in E_n
