The New Evolutionary Sociology Jonathan Turner, Richard Machalek, 2018-03-09 For decades evolutionary analysis was overlooked or altogether ignored by sociologists Fears and biases persisted nearly a century after Auguste Comte gave the discipline its name as did concerns that its effect would only reduce sociology to another discipline whether biology psychology or economics Worse apprehension that the application of evolutionary theory would encourage heightened perceptions of racism sexism ethnocentrism and reductionism pervaded Turner and Machalek argue instead for a new embrace of biology and evolutionary analysis Sociology from its very beginnings in the early 19th century has always been concerned with the study of evolution particularly the transformation of societies from simple to ever more complex forms By comprehensively reviewing the original ways that sociologists applied evolutionary theory and examining the recent renewal and expansion of these early approaches the authors confront the challenges posed by biology neuroscience and psychology to distinct evolutionary approaches within sociology They emerge with key theoretical and methodological discoveries that demonstrate the critical and compelling case for a dramatically enriched sociology that incorporates all forms of comparative evolutionary analysis to its canon and study of sociocultural phenomena
