Colloques internationaux du Centre national de la recherche scientifique, 1971 **String Theory and Fundamental Interactions** Maurizio Gasperini, Jnan Maharana, 2007-12-14 This book has been prepared to celebrate the 65th birthday of Gabriele Veneziano and his retirement from CERN in September 2007 This retirement certainly will not mark the end of his extraordinary scientific career in particular he will remain on the permanent staff of the Collège de France in Paris but we believe that this important step deserves a special celebration and an appropriate recognition of his monumental contribution to physics Our initial idea of preparing a volume of Selected papers of Professor Gabriele Veneziano possibly with some added commentary was dismissed when we realized that this format of book very popular in former times has become redundant today because of the full digitalization of all important physical journals and their availability online in the electronic archives We have thus preferred an alternative and unconventional but probably more effective form of celebrating Gabriele's birthday a collection of new papers written by his main collaborators and friends on the various aspects of theoretical physics that have been the object of his research work during his long and fruitful career
