

Subject-specific Marking Instructions

The purpose of this unit is to assess candidates' ability to:

Recall, select and communicate their knowledge and understanding of media products and the contexts in which they are produced and consumed (AO1).

Analyse and respond to media texts/topics using media key concepts and appropriate terminology (AO2).

Assessment Objectives Grid (includes QWC)

Question	AO1	AO2	Total
Section A	10	40	50
Section B	22	8	30
Totals	32	48	80

These are broken down by question as follows:

Q1 3 marks AO1 knowledge of generic conventions
7 marks AO2 textual analysis

Q2 20 marks AO2 textual analysis

Q3 7 marks AO1 knowledge of representation issues:
13 marks AO2 textual analysis

Q4 22 marks AO1 knowledge and understanding of TV or radio comedy texts, TV or radio channels and scheduling, and audience pleasures
8 marks AO2 textual analysis

Nanoparticles in Cancer Therapy Neelam Thakur, Bhukya Prudhvi Lal, 2024-11-08 This book presents the role of nanoparticles in cancer therapy emphasizing their innovative applications across treatment diagnosis and the development of therapeutic strategies The first section of the book describes the applications of nanoparticles in cancer vaccines and gene therapy It features discussions on polymeric nanoparticles as nanovaccine carriers membrane based nano vaccines for immunotherapy and gene therapy techniques employing nanoparticles The second section presents advanced nanomedicine approaches specifying the role of chemodynamic nanoparticles in cancer theranostics the application of low dimensional nanomaterials and emerging strategies against drug resistance Additionally it explores nanotechnology in radiation therapy phototherapy modalities and bioengineered virus like nanoparticles for diagnostics and therapeutics The last section reviews the clinical applications and prospects examining theranostic nanoparticles the clinical translation of nanomedicine and the current limitations of cancer nanotherapy It also addresses future directions in nanoparticle application and examines the genotoxicity immunotoxicity cytotoxicity assessments safety profiles targeted drug delivery and their role in viral oncogenesis This book is a useful resource for researchers clinicians and students in the fields of oncology and nanotechnology Topics in Theoretical and Computational Nanoscience Jeffrey Michael McMahon, 2011-06-24 Interest in structures with nanometer length features has significantly increased as experimental techniques for their fabrication have become possible The study of phenomena in this area is termed nanoscience and is a research focus of chemists pure and applied physics electrical engineers and others The reason for such a focus is the wide range of novel effects that exist at this scale both of fundamental and practical interest which often arise from the interaction between metallic nanostructures and light and range from large electromagnetic field enhancements to extraordinary optical transmission of light through arrays of subwavelength holes This dissertation is aimed at addressing some of the most fundamental and outstanding questions in nanoscience from a theoretical and computational perspective specifically At the single nanoparticle level how well do experimental and classical electrodynamics agree What is the detailed relationship between optical response and nanoparticle morphology composition and environment Does an optimal nanostructure exist for generating large electromagnetic field enhancements and is there a fundamental limit to this Can nanostructures be used to control light such as confining it or causing fundamentally different scattering phenomena to interact such as electromagnetic surface modes and diffraction effects Is it possible to calculate quantum effects using classical electrodynamics and if so how do they affect optical properties Single-ion Solvation Philippe Hünenberger, Maria Reif, 2011 Ions are ubiquitous in chemical technological ecological and biological processes Characterizing their role in these processes in the first place requires the evaluation of the thermodynamic parameters associated with the solvation of a given ion However due to the constraint of electroneutrality the involvement of surface effects and the ambiguous connection between microscopic and macroscopic

descriptions the determination of single ion solvation properties via both experimental and theoretical approaches has turned out to be a very difficult and highly controversial problem This unique book provides an up to date compact and consistent account of the research field of single ion solvation thermodynamics that has over one hundred years of history and still remains largely unsolved By reviewing the various approaches employed to date establishing the relevant connections between single ion thermodynamics and electrochemistry resolving conceptual ambiguities and giving an exhaustive data compilation in the context of alkali and halide hydration this book provides a consistent synthesis in depth understanding and clarification of a large and sometimes very confusing research field The book is primarily aimed at researchers professors postgraduates graduates and industrial researchers concerned with processes involving ionic solvation properties these are ubiquitous eg in physical organic analytical chemistry electrochemistry biochemistry pharmacology geology and ecology Because of the concept definitions and data compilations it contains it is also a useful reference book to have in a university library Finally it may be of general interest to anyone wanting to learn more about ions and solvation Key features discusses both experimental and theoretical approaches and establishes the connection between them provides both an account of the past research covering over one hundred years and a discussion of current directions in particular on the theoretical side involves a comprehensive reference list of over 2000 citations employs a very consistent notation including table of symbols and unambiguous definitions of all introduced quantities provides a discussion and clarification of ambiguous concepts ie concepts that have not been defined clearly or have been defined differently by different authors leading to confusion in past literature encompasses an exhaustive data compilation in the restricted context of alkali and halide hydration along with recommended values after critical analysis of this literature data is illustrated by a number of synoptic colour figures that will help the reader to grasp the connections between different concepts in one single picture **Popular Mechanics** ,1926-07
