26. Immunization by vaccination was first introduced by:

- A) Fleming in 1945
- B) Florey & Chain in 1975
- C) Flore & Chain in 1795
- D) Edward Jenner in 1865
- E) Edward Jenner in 1795

27. The science of growing terrestrial plants in an aerated solution is:

- A) Hydrodynamics
- B) Hydroponics
- C) Hydroponics
- D) Hydro topics
- E) None of them

28. An educated guess is called:

- A) Accumulated Data
- B) Observation
- C) Hypothesis
- D) Conclusion
- E) Inference

29. Dolly, the sheep was a highly successful clone from a somatic cell, reported back in:

- A) 1992
- B) 1993
- C) 1994
- D) 1995
- E) 1996

30. Crop rotation helps in:

- A) Growth of pathogens
- B) Soil Infertility
- C) Slowing of crops growth
- D) Eradication of disease
- E) Establishing the chance of particular weed parasites

31. Regarding cloning all are true except:

- A) It is product of duplicate copies of genetic material cells or entire living organism.
- B) It cannot be done artificially.
- C) Vegetative reproduction of nuts & fruits are quite possible.
- D) It is also used for treating disease.
- E) A major goal is to use in agriculture & medically significant substances.

32. Advantage of Hydroponic farming is:

- A) spreads weeds and soil disease problem.
- B) Crops are inhibited to grow in arid parts of the world.
- C) Fulfillment of food requirement of inhabitant is low.
- D) Area required for cultivation is reduced.
- E) Soilless or water culture techniques are not included in this science.

33. The entire surface region of earth inhabited by living things is called:

- A) Catasphere
- B) Ecosphere
- C) Ecosystem

The Local Configuration of New Research Fields Martina Merz, Philippe Sormani, 2015-10-27 This new Yearbook addresses the question of how policy place and organization are made to matter for a new research field to emerge Bringing together leading historians sociologists and organizational researchers on science and technology the volume answers this question by offering in depth case studies and comparative perspectives on multiple research fields in their nascent stage including molecular biology and materials science nanotechnology and synthetic biology The Yearbook brings to bear the lessons of constructivist ethnography and the practice turn in Science and Technology Studies STS more broadly on the qualitative comparative and critical inquiry of new research fields In doing so it offers unprecedented insights into the complex interplay of national research policies regional clusters particular research institutions and novel research practices in and for any emerging field of techno science It systematically investigates national and regional differences including the variable mobilization of such differences and probes them for organizational topicality and policy relevance

Under the Influence Robert H. Frank, 2021-10-19 From New York Times bestselling author and economics columnist Robert Frank a revelatory look at the power and potential of social context As psychologists have long understood social environments profoundly shape our behavior sometimes for the better but often for the worse Less widely noted is that social influence is a two way street Our environments are in large part themselves a product of the choices we make Society embraces regulations that limit physical harm to others as when smoking restrictions are defended as protecting bystanders from secondhand smoke But we have been slower to endorse parallel steps that discourage harmful social environments as when

regulators fail to note that the far greater harm caused when someone becomes a smoker is to make others more likely to smoke In Under the Influence Robert Frank attributes this regulatory asymmetry to the laudable belief that individuals should accept responsibility for their own behavior Yet that belief he argues is fully compatible with public policies that encourage supportive social environments Most parents hope for example that their children won t grow up to become smokers bullies tax cheats sexual predators or problem drinkers But each of these hopes is less likely to be realized whenever such behaviors become more common Such injuries are hard to measure Frank acknowledges but that s no reason for policymakers to ignore them The good news is that a variety of simple policy measures could foster more supportive social environments without ushering in the dreaded nanny state or demanding painful sacrifices from anyone Page iv of Cover

Immunotherapeutic and Immunoprophylactic Strategies for Infectious Diseases Giuseppe Andrea Sautto, Roberta Antonia
Diotti, 2020-10-28 **21st-Century Statecraft** Nayef Al-Rodhan, 2022-07-28 From civilisational frontier risks associated
with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion the 21st
century requires a new approach to statecraft In 21st Century Statecraft Professor Nayef Al Rodhan proposes five innovative
statecraft concepts He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity based
governance He shows how in an interdependent and interconnected world traditional thinking must move beyond zero sum
games and focus on multi sum and symbiotic realist interstate relations This requires a new paradigm of global security
premised on five dimensions of security and a new concept of power just power which highlights the centrality of justice to
state interests These concepts enable states to balance competing interests and work towards what the author calls
reconciliation statecraft Throughout Professor Al Rodhan brings his philosophical and neuroscientific expertise to bear
providing a practical model for conducting statecraft in a sustainable way **Organophosphorus Chemistry 2018** György
Keglevich, 2020-03-05 Organophosphorus chemistry is an important discipline within organic chemistry Phosphorus
compounds such as phosphines trialkyl phosphites phosphine oxides chalcogenides phosphonates phosphinates and P O H
species etc may be important starting materials or intermediates in syntheses Let us mention the Wittig reaction and the
related transformations the Arbuzov and the Pudovik reactions the Kabachnik Fields condensation the Hirao reaction the
Mitsunobu reaction etc Other reactions e g homogeneous catalytic transformations or C C coupling reactions involve P
ligands in transition metal Pt Pd etc complex catalysts The synthesis of chiral organophosphorus compounds means a
continuous challenge Methods have been elaborated for the resolution of tertiary phosphine oxides and for stereoselective
organophosphorus transformations P heterocyclic compounds including aromatic and bridged derivatives P functionalized
macrocycles dendrimers and low coordinated P fragments are also of interest An important segment of organophosphorus
chemistry is the pool of biologically active compounds that are searched and used as drugs or as plant protecting agents The

natural analogue of P compounds may also be mentioned Many new phosphine oxides phosphinates phosphonates and phosphoric esters have been described which may find application on a broad scale Phase transfer catalysis ionic liquids and detergents also have connections to phosphorus chemistry Green chemical aspects of organophosphorus chemistry e g microwave assisted syntheses solvent free accomplishments optimizations and atom efficient syntheses represent a dynamically developing field Last but not least theoretical approaches and computational chemistry are also a strong sub discipline within organophosphorus chemistry

Sudden arrhythmic death: from basic science to clinical practice

Gareth D. Matthews, 2014-10-02 With upwards of 4 5 million deaths worldwide each year and more than one tenth of these occurring in those with no previously documented heart disease sudden arrhythmic death SAD is both a major public health burden and a highly emotive issue for society at large Recent years have witnessed a marked expansion in our knowledge of the physiology underlying SAD both in the context of hereditary and acquired cardiac disorders Thanks largely to work in genetically modified animals the growth in our understanding of mechanisms underlying arrhythmia in the hereditary channelopathies has been particularly marked Our growing knowledge of the fundamental mechanisms underlying SAD has so far failed to spur substantial developments in clinical practice Despite a large body of work in both humans and animals it remains impossible to confidently identify those at high risk of SAD making pre emptive therapy a challenge What is more with the thankful exception of the implantable cardioverter defibrillators and pharmacological agents in very specific situations there has been depressingly little progress in finding new and effective therapies This Research Topic aims to go some way towards bridging the gap between advances in basic science and the development and delivery of new therapies It brings together original research contributions and review articles from key opinion leaders in the field focusing on the direct clinical implications of the basic science research now and in the future

Geographies of Meat Harvey Neo,Jody

Emel, 2017-03-16 With the ever rising demand for meat around the world the production of meat has changed dramatically in the past few decades What has brought about the increasing popularity and attendant normalization of factory farms across many parts of the world What are some of the ways to resist such broad convergences in meat production and how successful are they This book locates the answers to these questions at the intersection between the culture science and political

economy of meat production and consumption It details how and why techniques of production have spread across the world albeit in a spatially uneven way It argues that the modern meat production and consumption sphere is the outcome of a complex matrix of cultural politics economics and technological faith Drawing from examples across the world including America Europe and Asia the tensions and repercussions of meat production and consumption are also analyzed From a geographical perspective food animals have been given considerably less attention compared to wild animals or pets This book framed conceptually by critical animal studies governmentality and commodification is a theoretically driven and empirically rich study that advances the study of food animals in geography as well as in the wider social sciences *Issues in Science and Theology: Do Emotions Shape the World?* Dirk Evers, Michael Fuller, Anne Runehov, Knut-Willy

Sæther, 2016-04-14 This volume examines emotions and emotional well being from a rich variety of theological philosophical and scientific and therapeutic perspectives To experience emotion is a part of being human but what are emotions How can theology philosophy and the natural sciences unpack the nature and content of emotions This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi Italy It brings together contributions from scholars of various academic backgrounds from around the world whose individual insights are made all the richer by their juxtaposition with those from experts in other fields leading to a unique exchange of ideas **Contemporary Strategy**

Cumulated Index Medicus ,1976 The Action Plan for Australian Mammals 2012 Andrew Burbidge,John Woinarski,Peter Harrison,2014-06-02 The Action Plan for Australian Mammals 2012 is the first review to assess the conservation status of all Australian mammals It complements The Action Plan for Australian Birds 2010 Garnett et al 2011 CSIRO Publishing and although the number of Australian mammal taxa is marginally fewer than for birds the proportion of endemic extinct and threatened mammal taxa is far greater These authoritative reviews represent an important foundation for understanding the current status fate and future of the nature of Australia This book considers all species and subspecies of Australian mammals including those of external territories and territorial seas For all the mammal taxa about 300 species and subspecies considered Extinct Threatened Near Threatened or Data Deficient the size and trend of their population is presented along with information on geographic range and trend and relevant biological and ecological data The book also presents the current conservation status of each taxon under Australian legislation what additional information is needed for managers and the required management actions Recovery plans where they exist are evaluated The voluntary participation of more than 200 mammal experts has ensured that the conservation status and information are as accurate as possible and allowed considerable unpublished data to be included All accounts include maps based on the latest data from Australian state and territory agencies from published scientific literature and other sources The Action Plan concludes that 29 Australian mammal species have become extinct and 63 species are threatened and require urgent conservation action However it also shows that where guided by sound knowledge management capability and resourcing and longer term commitment there have been some notable conservation success stories and the conservation status of some species has greatly improved over the past few decades The Action Plan for Australian Mammals 2012 makes a major contribution to the conservation of a wonderful legacy that is a significant part of Australia s heritage For such a legacy to endure our society must be more aware of and empathetic with our distinctively Australian environment and particularly its marvellous mammal fauna relevant information must be readily accessible environmental policy and law must be based on sound evidence those with responsibility for environmental management must be aware of what priority actions they should take the urgency for action and consequences of inaction must be clear and the opportunity for hope and success must be recognised It is in this spirit that this account is offered
