In conjunction with Windows 95 and Visual Basic 4.0 software, this text will help students learn the fundamentals of writing computer applications in a Windows environment. It will allow them to create powerful graphical programs for school, home, or business. The authors' project approach takes the student through a seven-step programming process to create working applications. As the student's competence grows, step-by-step instructions become less detailed. Students learn structured programming techniques and a systematic approach to writing and debugging programs that are applicable to any language. At the same time, they become proficient in most of the features of Microsoft Visual Basic 4.0.
