A Beginner's Psychology Edward Bradford Titchener, 2023-12-28 It is an acknowledged fact that we perceive errors in the work of others more readily than in our own Leonardo da Vinci In this Beginner's Psychology I have tried to write as nearly as might be the kind of book that I should have found useful when I was beginning my own study of psychology That was nearly thirty years ago and I read Bain and the Mills and Spencer and Rabier and as much of Wundt as a struggling acquaintance with German would allow Curiously enough it was a paragraph in James Mill most unpsychological of psychologists that set me on the introspective track though many years had to pass before I properly understood what had put him off it A book like this would have saved me a great deal of labour and vexation of spirit Nowadays of course there are many introductions to psychology and the beginner has a whole library of text books to choose from Still they are of varying merit and what is perhaps more important their temperamental appeal is diverse I do not find it easy to relate this new book to the older Primer which will not be further revised There is change all through every paragraph has been rewritten The greatest change is however a shift of attitude I now lay less stress than I did upon knowledge and more upon point of view The beginner in any science is oppressed and sometimes disheartened by the amount he has to learn so many men have written and so many are writing the books say such different things and the magazine articles are so upsetting
