

Analytical Research Paper Sample: Impact of Advertising on Adolescents' Mentality

Abstract

This research is dedicated to the controversial topic of advertising to children. The researcher has analyzed two points of view with regard to the responsibility for the effects of advertisement on adolescent mentality. The research is focused both on measures that should be taken by parents within the family and by government at the state level in order to decrease the negative impacts of advertising. The researcher also offers efficient methods to solve the problem of negative effects of advertisement on children.

Introduction

Advertising is an indispensable part of the modern informational space. A great amount of advertising on TV and on the internet has a significant impact on adolescents' mentality, as children lack the experience and knowledge that would help them to differentiate real facts and marketing tools. Commercials influence adolescents' worldview in a negative way and enhance the attractiveness of a consumer lifestyle.

There are two main controversial points of view on the responsibility of advertising. The first statement claims parents to be responsible for protecting their children from the negative impact of advertising. The second statement considers this issue to be a problem that should be solved at the state level. This research is aimed at analyzing existing viewpoints with regard to influence of advertising on adolescents' mentality. The research will also offer a range of methods that will be helpful for channeling and restricting the negative effects of advertisements on children.

Analytic Research Foundations for the Next-Generation Electric Grid National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Analytical Research Foundations for the Next-Generation Electric Grid, 2016-05-15 Electricity is the lifeblood of modern society and for the vast majority of people that electricity is obtained from large interconnected power grids. However, the grid that was developed in the 20th century and the incremental improvements made since then, including its underlying analytic foundations, is no longer adequate to completely meet the needs of the 21st century. The next generation electric grid must be more flexible and resilient. While fossil fuels will have their place for decades to come, the grid of the future will need to accommodate a wider mix of more intermittent generating sources such as wind and distributed solar photovoltaics. Achieving this grid of the future will require effort on several fronts. There is a need for continued shorter term engineering research and development building on the existing analytic foundations for the grid. But there is also a need for more fundamental research to expand these analytic foundations. Analytic Research Foundations for the Next Generation Electric Grid provide guidance on the longer term critical areas for research in mathematical and computational sciences that is needed for the next generation grid. It offers recommendations that are designed to help direct future research as the grid evolves and to give the nation's research and development infrastructure the tools it needs to effectively develop, test, and use this research.

The Structure of Philosophical Discourse Kyle Lucas, Sarah Lucas, 2024-03-29 This book builds on existing work in genre analysis and move analysis in English for Specific Purposes (ESP) and applies this new framework to academic philosophical discourse, offering new insights into how ESP traditions can elucidate shifts in language conventions across disciplinary contexts. The volume begins by surveying the state of the art in English for Specific Purposes and genre theory as well as other genre theory paradigms before turning the focus on move analysis. Lucas and Lucas seek to maximize the potential of move analysis to precisely operationalize functional units of discourse by implementing a cognitive theory of genre grounded in frame semantics. Using the case of academic research articles in philosophy, the authors demonstrate how this framework can reveal distinctive dimensions unique to philosophical discourse and in turn how such an approach might be applied more broadly to examine nuances in language across disciplines and inform ESP research in the future. This book will appeal to students and researchers in English for Specific Purposes, discourse analysis, academic writing, applied linguistics, and rhetoric and composition.
