Skin malignancies frequently affect the periocular area, necessitating excision followed by eyelid reconstruction. Periocular trauma is also quite common and because of the highly complex regional anatomy requires expertise for effective reconstruction. Preparation by ophthalmic plastic surgeons prior to periorbital reconstruction is often not possible due to the unpredictability of defects left after Mohs micrographic surgeons clear tumor margins or in cases of trauma. Eyelid Reconstruction by renowned expert Suzanne Freitag and esteemed coeditors N Grace Lee, Daniel Lefebvre, and Michael Yoon fills a void in the literature. The book provides a quick and practical ophthalmic plastic surgery guide on how to plan and perform a full spectrum of periocular reconstruction procedures. The textbook is a compilation of patient cases and the authors' vast, richly diverse expertise. The book starts with two chapters covering complex periorbital anatomy and basic surgical principles, both of which are critical to performing safe and effective surgery. The third chapter provides a comprehensive overview of Mohs surgery in the

periorbital area an important topic given many defect reconstructions are secondary to Mohs micrographic surgical excisions Subsequent chapters organized by anatomic region feature discussion of surgical approaches for reconstructions of various size and depth defects The final chapter details eyelid trauma repair including lid margin and lacrimal lacerations Key Features An essential go to pre or peri operative reference surgeons can consult quickly as reconstruction cases arise Practical and concise procedural descriptions accompanied by numerous high quality photographs and illustrations enhance comprehension Chapters dedicated to medial canthus lower eyelid upper eyelid and lateral canthus reconstruction procedures discuss special considerations based on underlying anatomy adnexal structures and required functions This is a must have resource for residents fellows and experienced surgeons in the fields of ophthalmic plastic surgery ophthalmology otolaryngology facial plastic surgery plastic surgery dermatology Mohs surgery and maxillofacial surgery *Holden's Anatomy* Luther Holden,1885 **Ellis's Demonstrations of Anatomy** George Viner Ellis,1887 Human Anatomy Kent Marshall Van De Graaff,1988 Laboratory Manual by Kent Van De Graaff contains cat dissections and selected organ dissections It emphasizes learning anatomical structures through visual observation and knowledge of the functional relationship of one body system to another
