**Argument and Language** ,2019-02-18 Science Inquiry Argument and Language describes research that has focused on  
 addressing the issue of embedding language practices within science inquiry through the use of the Science Writing  
 Heuristic approach In recent years much attention has been given to two areas of science education scientific argumentation  
 and science literacy The research into scientific argument have adopted different orientations with some focusing on science  
 argument as separate to normal teaching practices that is teaching students about science argument prior to using it in the  
 classroom context while others have focused on embedding science argument as a critical component of the inquiry process  
 The current emphasis on science literacy has emerged because of greater understanding of the role of language in doing and  
 reporting on science Science is not viewed as being separate from language and thus there is emerging research emphasis  
 on how best to improving science teaching and learning through a language perspective Again the research orientations are  
 parallel to the research on scientific argumentation in that the focus is generally between instruction separate to practice as  
 opposed to embedding language practices within the science classroom context      *Math and Bio 2010* Lynn Arthur
