The View from the Helm James J. Duderstadt,2009-03-25 Widely regarded as one of the most active and publicly engaged university presidents in modern academia Duderstadt who led the University of Michigan from 1988 to 1996 presided over a period of enormous change not only for his institution but for universities across the country His presidency was a time of growth and conflict of sweeping new affirmative action and equal opportunity programs significant financial expansion and reenergized student activism on issues from apartheid to codes of student conduct Under James Duderstadt s stewardship Michigan reaffirmed its reputation as a trailblazer among universities Part memoir part history part commentary *The View from the Helm* extracts general lessons from his experiences at the forefront of change in higher education offering current and future administrators a primer on academic leadership and venturing bold ideas on how higher education should be steered into the twenty first century Crossing the Finish Line William G. Bowen,Matthew M. Chingos,Michael McPherson,2009-09-08 Why so many of America s public university students are not graduating and what to do about it The

United States has long been a model for accessible affordable education as exemplified by the country's public universities. And yet less than 60 percent of the students entering American universities today are graduating. Why is this happening and what can be done? *Crossing the Finish Line* provides the most detailed exploration ever of college completion at America's public universities. This groundbreaking book sheds light on such serious issues as dropout rates linked to race, gender, and socioeconomic status. Probing graduation rates at twenty-one flagship public universities and four statewide systems of public higher education, the authors focus on the progress of students in the entering class of 1999 from entry to graduation, transfer, or withdrawal. They examine the effects of parental education, family income, race, and gender, high school grades, test scores, financial aid, and characteristics of universities attended, especially their selectivity. The conclusions are compelling: minority students and students from poor families have markedly lower graduation rates and take longer to earn degrees, even when other variables are taken into account. Noting the strong performance of transfer students and the effects of financial constraints on student retention, the authors call for improved transfer and financial aid policies and suggest ways of improving the sorting processes that match students to institutions. An outstanding combination of evidence and analysis, *Crossing the Finish Line* should be read by everyone who cares about the nation's higher education system.

For Profit and For Good Iris Yob, 2023-11-25 *For Profit and For Good* opens up for critical examination a sector of higher education that surprisingly is rarely scrutinized in depth: the corporate institutions that have made up the fastest growing sector of US higher education in this century. It explores in detail the development of one such institution, Walden University, from its emergence out of the social turmoil and progressive education movement of the 1960s through the succeeding decades, characterized by changes on every front. It looks frankly at the impact of these forces on the university's original mission and describes the university's response to them. It investigates the idea of whether the resources and incentives of being for-profit have changed higher education in a way that benefits not only investors but also learners, their workplaces, and the larger community. Business models, management, technological developments, and changes in an ever-evolving society are issues every university faces, and seeing how this institution grappled with them will be instructive. Fundamentally, this book addresses the essential ethical question of whether the for-profit sector in higher education adds value, and if so, what that added value might be. This book will be of interest to researchers and students of the history of education, alternatives in higher education, the economics of education, education administration reform, and new developments in higher education, online learning, and policy studies in education. It is also relevant for policy makers and other managers in edubusiness.
