Unravelling Unlawful Confinement in Contemporary Armed Conflicts Jelena Plamenac, 2021-11-29 Winner of the 2022 Francis Lieber Prize This book explores how States and armed groups deprive us of liberty in armed conflict Intriguing insights into original field records of internal laws and first hand testimonies by fighters and humanitarians reveal hidden patterns of belligerents controversial behaviours in relation to three complex aspects of security detention in non international armed conflict that remain unsettled in international law permissible grounds procedural guarantees and transfer standards As you flip through the pages of this fascinating book you will gain a new understanding of where the boundary of unlawful confinement lies between local and international law and why we need a new international legal framework to protect us from arbitrariness in the warring parties decision to detain This book has won the 2022 Francis Lieber prize awarded at ASIL for the best monograph published on the law of armed conflict

International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Gerald Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

A New Scramble for Africa? Sören Scholvin, 2016-03-03 Global energy consumption will increase rapidly in the next decades The discrepancy between demand and supply is worrisome within the old and new cores of the world economy Sub Saharan Africa meanwhile possesses vast potential for energy resources to be further exploited Whilst the Global North is a traditional player in the sub Saharan energy sector new actors from emerging economies especially China s state owned enterprises but also Brazilian Indian and South African giants have entered what appears to be a scramble for the largely untapped energy resources of the region This book is the first to bring together comparative perspectives on The strategies of state and non state actors involved in the exploitation of sub Saharan energy resources The potential and pitfalls of new forms of cooperation on energy southwards of the Sahara The domestic opportunities and challenges of the present energy resource boom Dynamics on the international level are brought together with local developments to provide up to date insights on the scramble for energy resources in sub Saharan Africa This book also advances a materialist approach applicable in geographical and political scientific research showing that much insight can be gained by concentrating on the material environment that shapes economic and political phenomena 2025-26

World Economic Outlook, October 2017 International Monetary Fund. Research Dept.,2017-10-10 The global upswing in economic activity is strengthening Global growth which in 2016 was the weakest since the global financial crisis at 3.2 percent is projected to rise to 3.6 percent in 2017 and to 3.7 percent in 2018 The growth forecasts for both 2017 and 2018 are 0.1 percentage point stronger compared with projections earlier this year Broad based upward revisions in the euro area Japan emerging Asia emerging Europe and Russia where growth outcomes in the first half of 2017 were better than expected more than offset downward revisions for the United States and the United Kingdom But the recovery is not complete while the baseline outlook is strengthening growth remains weak in many countries and inflation is below target in most advanced economies Commodity exporters especially of fuel are particularly hard hit as their adjustment to a sharp step down in foreign earnings continues And while short term risks are broadly balanced medium term risks are still tilted to the downside The welcome cyclical pickup in global activity thus provides an ideal window of opportunity to tackle the key policy challenges namely to boost potential output while ensuring its benefits are broadly shared and to build resilience against downside risks A renewed multilateral effort is also needed to tackle the common challenges of an integrated global economy
