 symposium of the same name as this book and convened in Modena Italy recently As with the symposium the s cific goals of
 this text are to provide the most updated concepts in the m agement of a full spectrum of elbow pathology The content
 therefore is c prehensive in nature but with a focus on emerging options in the management of traumatic conditions as well
 as reconstructive options for the sequelae of trauma These topics are covered in detail in the 31 chapters which comprise
 this text The focus of each chapter was specifically designed to address the topic in the most timely fashion and with less of
 an emphasis on the historical context and more focus on current thinking The references documenting c tent are intended to
