Turning Points II

Tm' 2007 Ed. , Teaching Global History Alan J. Singer,2012-04-27 Teaching Global History challenges prospective

and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents and helpful charts, graphs, photographs and maps. High school students' responses are woven in throughout. Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer. The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions. Offering an alternative to such pre packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

The origin of ethical values is analyzed from a historical context and through investigating the spread of the Aryan civilization from India into the rest of the world. This book aims to highlight how trust is fundamental to transactions within an exchange economy.
