Applied Doughnut Economics and Neuroeconomic Psychology for Business and Politics Larsen, Torben, 2021-05-21

Psychological and ecological research has eroded the foundation of mainstream economics and a new approach is needed rather than an adaptation of existing theory The most promising new approach is doughnut economics DE version 2.0 of the discipline of economics for the 21st century that presents economics as an embedded discipline between the social foundation and the ecosystem with a focus on the disciplinary boundaries The study of neuroeconomics such as doughnut economics still holds a gap between laboratory findings on homo neuroeconomics and the issues in contemporary behavioral economics To understand a positivist application of doughnut economics within the new economic frameworks of the 21st century further research must be discussed Applied Doughnut Economics and Neuroeconomic Psychology for Business and Politics follows the economic history from the Stone Age to that of the modern creative man and then provides a specific focus on doughnut economics and 21st century neuroeconomics This new type of behavioral economics will be linked to neuroeconomic psychology and behavioral science with a focus in areas such as cognitive training economic ecology the new welfare economy and globalized markets This book is ideal for health economists economists leaders in politics and business psychologists economic theorists practitioners researchers academicians and students interested in doughnut economics and the psychology behind it
