Friendship and Happiness Melikşah Demir, 2015-04-09 This is

the first book that explicitly focuses on the relationships between various types of friendship experiences and happiness. It addresses historical theoretical and measurement issues in the study of friendship and happiness e.g. why friends are important for happiness. In order to achieve a balanced evaluation of this area as a whole, many chapters in the book conclude with a critical appraisal of what is known about the role of friendship in happiness and provide important directions for future research. Experts from different parts of the world provide in depth authoritative reviews on the association between different types of friendship experiences e.g. friendship quantity, quality and happiness in different age groups and cultures. An ideal resource for researchers and students of positive psychology, this rich, clear and up to date book serves as an important reference for academicians in related fields of psychology such as cross cultural, developmental and social.

Social Computing and Social Media Adela Coman, Simona Vasilache, 2024-05-31. This book constitutes the refereed proceedings of the 16th International Conference on Social Computing and Social Media (SCSM 2024) held as part of the 26th HCI International Conference (HCII 2024) which took place in Washington DC, USA during June 29-July 4, 2024. The SCSM 2024 proceedings were organized in the following topical sections: Part I: Designing, developing and evaluating social media user experience and user behavior in social media; AI and language models in social media; Part II: Social media in learning, education and culture; social media in business and e-commerce; Part III: Computer mediated communication; social media for community, society and democracy.

Rethinking the Music Business Guy Morrow, Daniel Nordgård, Peter Tschmuck, 2022-09-07. COVID-19 had a global impact on health, communities and the economy. As a result of COVID-19, music festivals, gigs and events were canceled or postponed across the world. This directly affected the incomes and practices of many artists and the revenue for many entities in the music business. Despite this crisis, however, there are pre-existing trends in the music business: the rise of the streaming economy, technological change, virtual and augmented reality, blockchain etc. and new copyright legislation. Some of these trends were impacted by the COVID-19 crisis while others were not. This book addresses these challenges and trends by following a two-pronged approach: the first part focuses on the impact of COVID-19 on the music business and the second features general perspectives. Throughout both parts, case studies bring various themes to life. The contributors address issues within the music business before and during COVID-19. Using various critical approaches for studying the music business, this research-based book addresses key questions concerning music contexts, rights, data and COVID-19. *Rethinking the music business* is a valuable study aid for undergraduate and postgraduate students in subjects including the music business, cultural economics, cultural management, creative and cultural industries studies, business and management studies and media and communications.
