Focus On: 100 Most Popular Billboard Mainstream Top 40 (Pop Songs) Number-one Singles Wikipedia contributors, **Computational Social Science** Xiaogang Wu, Yongjun Zhang, Tianji Cai, 2024-06-07 This edited collection provides an overview of the recent developments in computational social science related to China studies and presents interdisciplinary empirical work from diverse scholars on culture public opinion and education using advanced computational methods and big data The topics covered in this book include the surge of anti China sentiment amid the COVID 19 pandemic the nuances of E governance public opinion authoritarian reactions artistic innovation and educational inequality The chapters in this book provide important insights into how computational social science can be applied generally but also underscore the importance of combining conventional sociological research with contemporary computational methods in the context of China studies This cutting edge volume will be valuable resource for researchers scholars and practitioners of Sociology China Studies and for those interested in computational approaches to the social sciences The chapters in this book were originally published in Chinese Sociological Review

Friendship and Happiness Melikşah Demir, 2015-04-09 This is the first book that explicitly focuses on the relationships between various types of friendship experiences and happiness It addresses historical theoretical and measurement issues in the study of friendship and happiness e g why friends are important for happiness In order to achieve a balanced evaluation of this area as a whole many chapters in the book conclude with a critical appraisal of what is known about the role of friendship in happiness and provide important directions for future research Experts from different parts of the world provide in depth authoritative reviews on the association between different types of friendship experiences

e.g. friendship, quantity, quality and happiness in different age groups and cultures. An ideal resource for researchers and students of positive psychology, this rich, clear and up-to-date book serves as an important reference for academicians in related fields of psychology such as cross-cultural, developmental and social. *Social Computing and Social Media* Adela Coman, Simona Vasilache, 2024-05-31. This book constitutes the refereed proceedings of the 16th International Conference on Social Computing and Social Media (SCSM 2024) held as part of the 26th HCI International Conference (HCII 2024) which took place in Washington, DC, USA during June 29-July 4, 2024. The total of 1271 papers and 309 posters included in the HCII 2024 proceedings was carefully reviewed and selected from 5108 submissions. The SCSM 2024 proceedings were organized in the following topical sections: Part I: Designing, developing and evaluating social media user experience and user behavior in social media; AI and language models in social media; Part II: Social media in learning, education and culture; social media in business and e-commerce; Part III: Computer-mediated communication; social media for community, society and democracy.

Rethinking the Music Business Guy Morrow, Daniel Nordgård, Peter Tschmuck, 2022-09-07. COVID-19 had a global impact on health, communities and the economy. As a result of COVID-19, music festivals, gigs and events were canceled or postponed across the world. This directly affected the incomes and practices of many artists and the revenue for many entities in the music business. Despite this crisis, however, there are pre-existing trends in the music business: the rise of the streaming economy, technological change, virtual and augmented reality, blockchain, etc., and new copyright legislation. Some of these trends were impacted by the COVID-19 crisis, while others were not. This book addresses these challenges and trends by following a two-pronged approach: the first part focuses on the impact of COVID-19 on the music business, and the second features general perspectives. Throughout both parts, case studies bring various themes to life. The contributors address issues within the music business before and during COVID-19. Using various critical approaches for studying the music business, this research-based book addresses key questions concerning music contexts, rights, data and COVID-19. *Rethinking the music business* is a valuable study aid for undergraduate and postgraduate students in subjects including the music business, cultural economics, cultural management, creative and cultural industries studies, business and management studies, and media and communications. **Applied Artificial Intelligence in Business** Leong Chan, Liliya Hogaboam, Renzhi Cao, 2022-07-19. This book offers students an introduction to the concepts of big data and artificial intelligence (AI) and their applications in the business world. It answers questions such as: what are the main concepts of artificial intelligence and big data? What applications for artificial intelligence and big data analytics are used in the business field? It offers application-oriented overviews and cases from different sectors and fields to help readers discover and gain useful insights. Each chapter features discussion questions and summaries. To assist professors in teaching the book, supplementary materials will include answers to questions and presentation slides.

Social Convergence in Times of Spatial Distancing: The Role of Music During the COVID-19 Pandemic Niels Chr. Hansen, Melanie Wald-Fuhrmann, Jane Whitfield Davidson, 2022-07-19.
