participant observations and other analyses of Spotify's front end with experimental covert investigations of its back end. The authors engaged in a series of interventions which include establishing a record label for research purposes intercepting network traffic with packet sniffers and web scraping corporate materials. The authors' innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use; the company later threatened their research funding. Thus the book itself became an intervention into the ethics and legal frameworks of corporate behavior. Spotify Music Marketing Rescue, 2020
