

Analyzing Cyber Law Through the Lens of Medical Law: Comparative Insights and Legal Theory Applications

Author: Kane Biery

Date: 4/11/2022

Abstract

As the digital and healthcare sectors increasingly intersect, the need to understand the interplay between cyber law and medical law becomes crucial. This study aims to analyze cyber law through the lens of medical law, exploring how both legal frameworks can be compared and integrated to address emerging challenges in the protection of sensitive data and the maintenance of security. Cyber law governs data protection, privacy, and cybersecurity in the digital space, while medical law focuses on patient confidentiality, medical ethics, and the legal responsibilities of healthcare providers in safeguarding patient information. The convergence of these two fields is particularly important as health systems adopt more digital technologies, creating new risks and opportunities for data breaches and cyberattacks. Through a comparative approach, this paper highlights the similarities and differences in the ways these legal systems address issues of privacy, data security, and the ethical use of information. Legal theory applications are also explored to understand the underlying principles that guide both cyber and medical law, such as autonomy, justice, and confidentiality. The study emphasizes how both domains can benefit from a more integrated approach to address common challenges, such as ensuring secure data sharing, promoting transparency, and establishing clear legal frameworks that protect both individual privacy and public health. By analyzing these legal areas side by side, the paper provides insights into how legal theory can inform both cyber law and medical law in developing cohesive policies and regulatory practices. This research ultimately contributes to a deeper understanding of the legal protections needed to secure personal and medical data, advocating for more adaptable and comprehensive legal responses in the face of rapid technological advancements and new societal risks.

Keywords: Cyber law, medical law, data protection, privacy, cybersecurity, legal theory, patient confidentiality, comparative law, data security, healthcare ethics.
